SECTION I - GENERAL INFORMATION

A. OBJECTIVE

The City of Ann Arbor's Procurement office is soliciting bids for the following: The City of Ann Arbor Water Treatment Plant (WTP) has 26 granular activated carbon (GAC) filters for drinking water treatment. The work required under this proposal includes the removal, regeneration, and replacement of GAC supplied by the proposer in each designated filter. The GAC in five filters is typically replaced every six months, with one GAC replacement event in the spring and one in the fall. Each filter contains on average 900 cubic feet of GAC as specified in the detailed specifications, which corresponds to approximately 4500 cubic feet per GAC replacement event. Filter measurements are provided before each GAC replacement and filters must be filled to capacity. The bidder shall supply all labor and equipment necessary to complete the work. Work will commence based on the specifications provided herein after City council approval and contract execution (estimated July 1, 2025). The pricing for this RFP shall be firm for one (1) year. Upon mutual agreement between the City and the vendor the pricing provided in this ITB may be extended for four (4) additional one (1) year periods not to exceed five (5) years in total. Any price adjustments in shall be tied to the producer price index for basic chemical manufacturing (PPI code 3251) and renewals will be evaluated if they are in the best interest of the City.

Granular activated carbon must be supplied to the City Water Treatment Plant, fob destination, freight prepaid. The selected bidder will be responsible for transferring the product from the transport vehicle to the City storage vessel. The Bidder shall be responsible for removing the spent carbon from the filters being serviced and transporting it off site.

The bidder will be required to follow City safety requirements while on City property. This includes but is not limited to following all appropriate safety precautions for the filters as non-permit required confined spaces, bringing locks to follow LOTO protocols of valves going in to the filters, using a ladder that extends at least 3' above the railings around the filters, wearing appropriate safety gear (e.g., hard hats, safety glasses, vests, and steel-toed boots), and participating in safety tailgate meetings prior to the commencement of work.

Each bidder shall provide the City of Ann Arbor with a complete copy of the U.S. Department of Occupational Safety & Health Administration Safety Data Sheet (SDS) for each product bid.
