

CITY OF ANN ARBOR, WWTP
LAND APPLICATION OF MUNICIPAL WASTERWATER BIOSOLIDS
ATTACHMENT TO RFP-816

January 25, 2012, Pre-Proposal meeting Question (Q.) and Answer (A.).

Q.: What is the current per unit cost for this service?

A.: The current cost is \$0.0341per gallon.

Q.: What is the current cost adjustment method used by the City and its contractor?

A.: The City and the current contractor have agreed to use the Fuel Cost Adjustment (FCA) method.

Q.: What is the typical distance to a land application site (e.g. farm field)?

A.: The typical distance is about 25 miles. The contractor may have to travel greater distances if more local land application sites are not available.
