Subject: City Requirements Concerning Public Sidewalk and Drive Approach Construction

Ladies and Gentlemen:

Attached is an information packet which has been created from various sources concerning public sidewalk and drive approach construction in the City of Ann Arbor. This information includes an excerpt from Chapter 47 of the City Code of Ordinances, and certain standard details and text excerpts from the Public Services Department Standard Specifications relating to this type of work.

This packet is meant to provide an overview of highlighted requirements for this type of construction. **All** City requirements must be followed. The omission of any requirement does not relieve the contractor from constructing the work in complete conformance to the Public Services Department Standard Specifications. Copies of the Standard Specifications may be purchased from the Project Management Services Unit during regular business hours. The cost of the book and disk is \$35.00 and \$15.00 per copy, respectively, which includes the mailing of any updates to all registered book and disk holders. The Public Services Department Standard Specifications are also available at no cost on the Private Development webpage at:

www.a2gov.org/government/publicservices/project_management/privatedev

As we are unable to track those who receive this information packet, and as this information included in the packet is subject to revision and updating, the contractor is responsible for verifying that the most current standard details are followed.

Very truly yours,
PUBLIC SERVICES AREA

Homayoon Pirooz, P.E.
Project Management Manager
