

**Final Restoration:**

There are some work items which will be completed shortly after the final pavement operation is done and all streets are opened for traffic. This work will be done under flag control and would not impact more than one leg of traffic at the time:

- Applying permanent pavement markings.
- Stenciling and coloring bituminous pavement on top of safety islands and at all pedestrian crossings.
- Installation of the light poles on safety islands by the roundabout. Those lights would provide additional illumination and driver warning at the pedestrian crossings.
- Landscaping.
- AATA will be installing passenger shelters at the bus stops along Nixon Road.
