The Sylvan Avenue Permeable Pavement Project

Public Meeting

Wednesday, December 2, 2009

7:00 p.m.

**Tappan Middle School Cafeteria
2251 E. Stadium Boulevard**

The City is planning to reconstruct Sylvan Avenue in 2010, making use of permeable pavement technology to better manage storm water runoff and improve water quality in the Allens Creek watershed. Other possible aspects of the project include the replacement of the curb and gutter, converting the street to a one-way street, and providing connection points where property owners can connect sump pump and possibly roof drain discharges.

The purpose of this public meeting is to present and explain the project to property owners on Sylvan Avenue as well the public in general, and to address any questions, comments, or concerns that may arise.
