This street resurfacing project is paid for by the 2009 American Recovery and Reinvestment Act (ARRA) and the City of Ann Arbor 2006 Street Resurfacing Millage

**Notice of Temporary Traffic Control Plan
PLYMOUTH ROAD (July 6 – September 3, 2010)
AND
GREEN ROAD IMPROVEMENT PROJECT (to be determined)**

Location and Limits of Affected Area:

Plymouth Road from east of Nixon Road to west of US-23, including the northbound and/or southbound major roadway intersection approaches to Plymouth Road from Nixon Road, Huron Parkway and Green Road, and the ramps from US-23. Minor side street intersections and driveways on Plymouth Rd within the above limits will also be affected by the project.

Description of Work:

Road construction on Plymouth Road associated with the Plymouth Road and Green Road Improvement Project. The City of Ann Arbor will be overseeing work required to rehabilitate and resurface Plymouth Road from Nixon Road to US-23. Work will be done in two stages beginning with the southerly two lanes in Stage 1 and the remaining northerly three lanes in Stage 2. During this time the roadway will be reduced to one traffic lane operating in each direction. Once Plymouth Road is complete and fully reopened to traffic, work will begin on Green Road.

Temporary Construction Traffic Control Plan:

Beginning July 6, 2010 the project contractor will be closing the two southerly two lanes of Plymouth Road between Nixon Road and US-23. Traffic will be shifted to the northerly side of the roadway and will be reduced to operating on one lane in each direction. Following completion of the south side of the road, traffic will be shifted onto the newly resurfaced pavement and work will begin on the northerly portion of Plymouth Road. Again, the roadway will be reduced to one traffic lane operating in each direction. Upon completion of the north side, Plymouth Road will be fully reopened to traffic and will operate as it does presently with two lanes in each direction separated by a continuous center left turn.

Also during construction, traffic approaching Plymouth Road from Nixon Road, Huron Parkway, Green Road, the US-23 exit ramps and some minor side streets will experience lane closures and traffic shifts, as required, to facilitate completion of the project.

During this work the traffic may experience delays within and beyond the areas influenced by the construction. Motorists are advised to seek alternate routes. Traffic signs and other devices will be posted to notify and direct those approaching and traveling through the project work zone. To maintain the safety of all, please reduce speeds and drive cautiously. We thank you in advance for your patience as these necessary public infrastructure improvements are completed.
