

## NIXON CORRIDOR IMPROVEMENT PROJECT

Public Workshop • October 24, 2018, 6:30 - 8:30 PM

The workshop format being used tonight will enable more time for residents to discuss and ask questions on many aspects of the project ranging from specific intersections to the corridor. City and Wade Trim staff, the engineering consultant, will be available to answer questions and gather feedback from participants.

Tables can be visited in any order but you may find it helpful to visit the Project Overview table first. When asking questions, we ask that you respect the time of others waiting in line and allow them to ask questions too. You are welcome to revisit tables.

If you would like to leave a written comment, forms are provided at each table. A summary of each table is presented below. Thank you for attending.

### PROJECT OVERVIEW

Purpose of Nixon Corridor Improvement Project including pedestrian safety and timeline of project activities.

### PROJECT AREA 1

Project components from Huron Parkway to Sandalwood Circle (north)

### PROJECT AREA 2

Project components from Bluett Drive to Traver Boulevard

### PROJECT AREA 3

Project components from Argonne Drive to Dhu Varren Road

### PROJECT AREA 4

Project components from Dhu Varren Road to north of Barclay Way

### TRAFFIC CIRCULATION

Computer simulation showing how traffic will move through the corridor with the updated preliminary design concept.
