Not every relationship or situation disclosed on the Disclosure Form may be a disqualifying conflict. Depending on applicable law and regulations, some contracts may be awarded on the recommendation of the City Administrator after full disclosure, where such action is allowed by law, if demonstrated competitive pricing exists and/or it is determined the award is in the best interest of the City. A copy of the Vendor Conflict of Interest Disclosure Form is attached.

If a bidder contacts a City Service Area/Unit and indicates a desire to protest an award, the Service Area/Unit shall refer the bidder to the Purchasing Agent. The Purchasing Agent will provide the bidder with the appropriate instructions for filing the protest. The protest shall be reviewed by the City Administrator or designee whose decision shall be final.

GENERAL CONDITIONS

Section 1 - Wage Requirements

Under this Contract, the Contractor shall conform to Chapter 14 of Title I of the Code of the City of Ann Arbor as amended; which in part states "...that all craftsmen, mechanics and laborers employed directly on the site in connection with said improvements, including said employees of subcontractors, shall receive the prevailing wage for the corresponding classes of craftsmen, mechanics and laborers, as determined by statistics for the Ann Arbor area compiled by the United States Department of Labor. At the request of the City, any contractor or subcontractor shall provide satisfactory proof of compliance with the contract provisions required by the Section."

Where the Contract and the Ann Arbor City Ordinance are silent as to definitions of terms required in determining contract compliance with regard to prevailing wages, the definitions provided in the Davis-Bacon Act as amended (40 U.S.C. 278-a to 276-a-7) for the terms shall be used.

Further, to the extent that any employees of the Contractor providing services under this contract are not part of the class of craftsmen, mechanics and laborers who receive a prevailing wage in conformance with Section 1:319 of Chapter 14 of Title I of the Code of the City of Ann Arbor, the Contractor agrees to conform to Chapter 23 of Title I of the Code of the City of Ann Arbor, as amended, which in part states:

1:814. Applicability.

(1) This Chapter shall apply to any person that is a contractor/bidder or grantee as defined in Section 1:813 that employs or contracts with five (5) or more individuals; provided, however, that this Chapter shall not apply to a non-profit contractor/bidder or non-profit grantee unless it employs or contracts with ten (10) or more individuals.

(2) This Chapter shall apply to any grant, contract, or subcontract or other form of financial assistance awarded to or entered into with a contractor/bidder or grantee after the effective date of this Chapter and to the extension or renewal after the effective date of this Chapter of any grant, contract, or subcontract or other form of financial assistance with a contractor/bidder or grantee.

1:815. Living Wages Required.

(1) Every contractor/bidder or grantee, as defined in Section 1:813, shall pay its covered employees a living wage as established in this Section.

(a) For a covered employer that provides employee health care to its employees, the living wage shall be $12.70 an hour, or the adjusted amount hereafter established under Section 1:815(3).

(b) For a covered employer that does not provide health care to its employees, the living wage shall be $14.18 an hour, or the adjusted amount hereafter established under Section 1:815(3).
(2) In order to qualify to pay the living wage rate for covered employers providing employee health care under subsection 1:815(1)(a), a covered employer shall furnish proof of said health care coverage and payment therefor to the City Administrator or his/her designee.

(3) The amount of the living wage established in this Section shall be adjusted upward no later than April 30, 2002, and every year thereafter by a percentage equal to the percentage increase, if any, in the federal poverty guidelines as published by the United States Department of Health and Human Services for the years 2001 and 2002. Subsequent annual adjustments shall be based upon the percentage increase, if any, in the United States Department of Health and Human Services poverty guidelines when comparing the prior calendar year's poverty guidelines to the present calendar year's guidelines. The applicable percentage amount will be converted to an amount in cents by multiplying the existing wage under Section 1.815(1)(b) by said percentage, rounding upward to the next cent, and adding this amount of cents to the existing living wage levels established under Sections 1:815(1)(a) and 1:815(1)(b). Prior to April 1 of each calendar year, the City will notify any covered employer of this adjustment by posting a written notice in a prominent place in City Hall, and, in the case of a covered employer that has provided an address of record to the City, by a written letter to each such covered employer.

Contractor agrees that all subcontracts entered into by the Contractor shall contain similar wage provision covering subcontractor’s employees who perform work on this contract.

Section 3 - Non-Discrimination by City Contractors

The Contractor agrees to comply, and to require its subcontractor(s) to comply, with the nondiscrimination provisions of Section 209 of the Elliot-Larsen Civil Rights Act (MCL 37.2209). The Contractor further agrees to comply with the nondiscrimination provisions of Chapter 112 of the Ann Arbor City Code and to assure that applicants are employed and that employees are treated during employment in a manner which provides equal employment opportunity. The Contractor further agrees to comply with the provisions of Section 9:158 of Chapter 112 of the Ann Arbor City Code and in particular the following excerpts:

9:158. - Nondiscrimination by city contractors.

(1) All contractors proposing to do business with the City of Ann Arbor shall satisfy the contract compliance administrative policy adopted by the City Administrator in accordance with the guidelines of this section. All city contractors shall ensure that applicants are employed and that employees are treated during employment in a manner which provides equal employment opportunity and tends to eliminate inequality based upon any classification protected by this chapter. All contractors shall agree not to discriminate against an employee or applicant for employment with respect to hire, tenure, terms, conditions, or privileges of employment, or a matter directly or indirectly related to employment, because of any applicable protected classification.

(2) All contractors shall be required to post a copy of Ann Arbor's Non-Discrimination Ordinance at all work locations where its employees provide services under a contract with the city.

(3) Upon request, each prospective contractor shall submit to the city data showing current total employment by occupational category, sex and minority group and shall respond to information requests documenting its equal employment opportunity policies and procedures.
If the contract which is being awarded includes federal requirements for affirmative action, each prospective contractor shall submit to the city data showing current total employment by occupational category, sex and minority group. If, after verifying this data, the City Administrator's designee concludes that it indicates total minority and female employment commensurate with their availability within the contractor's labor recruitment area, i.e., the area from which the contractor can reasonably be expected to recruit, said contractor shall be accepted by the City Administrator's designee as having fulfilled affirmative action requirements for the period of the contract at which time the City Administrator's designee shall conduct another review. If the data demonstrates an under-representation the contractor shall develop an affirmative action program for review by the City Administrator's designee. Said program shall include specific goals and timetables for the hiring and promotion of minorities and females. Said goals shall reflect the availability of minorities and females within the contractor's labor recruitment area. In the case of construction contractors, the City Administrator's designee shall use for employment verification the labor recruitment area of the Ann Arbor metropolitan statistical area. Construction contractors determined to be in compliance shall be accepted by the City Administrator's designee as having fulfilled affirmative action requirements for a period of 1 year at which time the City Administrator's designee shall conduct another review.

In hiring for construction projects, contractors shall make good faith efforts to employ local persons, so as to enhance the local economy.

All contracts shall include provisions through which the contractor agrees to follow all applicable federal and state laws.

The City Administrator's designee shall monitor the compliance of each contractor with the nondiscrimination provisions of each contract. The City Administrator's designee, together with the Human Rights Commission, shall develop procedures and regulations consistent with the administrative policy adopted by the City Administrator for notice and enforcement of non-compliance. Such procedures and regulations shall include a provision for the posting of contractors not in compliance.

The City Administrator's designee will provide the City's Human Rights Commission with an annual summary report of contracts awarded; affirmative action requirements reviewed, where applicable; any complaints received alleging violation of the contractor's non-discrimination requirements, and actions taken. The Human Rights Commission will be provided, at its request, with additional information related to the report. The Human Rights Commission and the City Administrator's designee will report annually to the City Council on compliance of city contractors with this chapter.

All city contracts shall provide further that breach of the obligation not to discriminate shall be a material breach of the contract for which the city shall be entitled, at its option, to do any or all of the following:

(a) Cancel, terminate, or suspend the contract in whole or part and/or refuse to make any required periodic payments under the contract;
(b) Declare the contractor ineligible for the award of any future contracts with the city for a specified length of time;
(c) Recover liquidated damages of a specified sum, said sum to be that percentage of the labor expenditure for the time period involved which would have accrued to protected class members had the discrimination provisions not been breached;
(d) Impose for each day of non-compliance, liquidated damages of a specified sum, based upon the following schedule:

How Water Usage is Measured and Billed
Water is measured in one hundred cubic feet. One hundred cubic feet (ccf) is equal to 748 gallons. To calculate your water usage in gallons, multiply the water consumption in ccf units by 748.

View Your Water Use On-line
The City of Ann Arbor is among the first water utilities in the country to offer customers on-line access to nearly real-time, customer specific usage data and bill statement summaries. On the city’s webpage at www.a2gov.org, enter your address under Property Information on the left hand side and then enter your account number on the water tab. Use the “Analyze Daily Water Consuption” option to view the daily readings for a range of dates of your own choosing. This information can help you to identify patterns in water usage and take steps to reduce unnecessary water waste and costs.

Quarterly Charges
For a typical residential 5/8" meter, there will be a $11.25 quarterly water service customer charge, a $11.25 sewer service customer charge and a storm water customer charge of $6.77. These customer charges will apply even if zero ccf of water is used during the billing period. The Storm water charge is based on your percentage of impervious area. A normal storm water charge of $26.32 per quarter applies for the average residential property. Customer charge amounts provided upon request for water meters larger than 5/8".

Correspondence regarding your water bill or water service should be sent to:

The Summer Sewer Base
The summer sewer base applies to residential accounts only. Customers are eligible to have the summer sewer base applied after they have been a customer at the service location for one year. The summer sewer base saves customers money during the summer months when they typically use more water outdoors. The summer sewer base eliminates sanitary sewer charges for additional water used outdoors which is not disposed in the sanitary sewer system. Your summer sewer base is established mid-November through mid-December which primarily reflect indoor usage. You will not be billed for sanitary sewer charges beyond this base average even though your water consumption may increase during the summer months.

No silver bullet for clearing snow and ice

Winter means slippery driveways, walkways and sidewalks. This season also brings products and home mixtures that promise to keep surfaces safe and dry. Ultimately each de-icing option has benefits, limitations and drawbacks.

Salt can be the least expensive and most abundant material for ridding surfaces of ice, but its effectiveness drops as surfaces fall below 18 degrees Fahrenheit and overuse can pollute water supplies. After careful deliberation years ago, the Ann Arbor City Council directed city crews to use a 95/5 percent sand/salt mixture on residential streets to decrease the use of salt alone.

There are all kinds of non-toxic materials available for purchase, which if you have pets, can be a good choice. Some solutions, like products containing calcium chloride (CaCl2), can melt snow at lower temperatures, is less harmful to plants and animals, but eats into metal and concrete. In addition, CaCl2 binds to water and can’t be separated, which has the potential to do permanent harm to the environment.

Products that contain potassium acetate can block ice from forming at very low temperatures, are noncorrosive and biodegradable, however, these products lower oxygen levels in water and can harm fish and plants in our waterways.

Some find various brines to help prevent ice from sticking to surfaces, while others use a bit of sugar in their salt to lower the temperature at which it’s effective. When in doubt, the best course of action is to use as little de-icer as possible and, if feasible, use physical means to remove ice or snow.

Learning the hard way: The worst time to learn how to shut off the water

Don’t wait until a winter causes a pipe to burst or leak to learn where your water shut off is. Most homes are equipped with isolation valves, typically located where water enters the house. Unfortunately these valves often go unused, so when the time comes, they can’t be found or they don’t operate properly. Isolation valves, in relatively newer homes, should be located and tested several times a year, during warmer months. Another tip: post the location of your isolation valve in an easy-to-find spot, along with a testing schedule. In older homes, isolation valves should be approached with caution, as they may break when used and therefore may require the attention of a professional plumber.

If you experience a broken or leaking water pipe, and can’t find your isolation valve, or it doesn’t work, please contact the city so that we can shut off your water using the curb valve, for a fee. If a water emergency occurs, please call us at 734.794.6320 Monday - Friday 8 a.m.-5 p.m. At all other times, please call 734.994.2840. If you live in a rental property/multi-family/apartment building please contact your property manager first.
It’s a toilet not a trashcan - what not to flush down the drain

The list below identifies some items that should not be flushed:

- Baby wipes and diapers
- “Flushable wipes,” even if advertised as safe to flush
- Rags and towels
- Cotton swabs
- Prescription medication
- Syringes
- Candy and other food wrappers
- Clothing labels
- Toys (e.g., stuffed animals, cars, etc.)
- Plastic items of any kind
- Aquarium gravel or kitty litter
- Rubber items (latex gloves)
- Cigarette butts
- Sanitary napkins
- Hair
- Underwear (odd, but we find it)

Flushing any of these items can cause blockages in sewer lines, which could result in busted pipes, sewage overflows and basement backups.

Tips to prevent freezing pipes

Help keep pipes from freezing during the cold winter months with these tips:

- For pipes located within cabinets, open the cabinet doors to allow warm air to circulate through. If you have young children, move any chemicals or cleaners that may have otherwise been out of reach behind the cabinet doors.
- Insulate any spigots or pipes on the outside of your home.
- Let your faucet drip to keep water moving through the pipes.
- Set your thermostat to the same temperature day and night. A slightly higher energy bill is worth avoiding the expense of a broken pipe and possible flooding.
- If you will be away from home, set your thermostat no lower than 55 degrees.
- In the long term, consider moving any exposed pipes inside, add insulation and replace old, drafty windows.
