CONSTRUCTION NOTES:

1. The Contractor shall coordinate and maintain construction control measures as required by the City of Ann Arbor. A City of Ann Arbor permitted construction control officer shall be on site at the beginning of construction.

2. The Contractor shall coordinate and maintain construction control measures as required by the City of Ann Arbor. A City of Ann Arbor permitted construction control officer shall be on site at the beginning of construction.

3. The Contractor shall coordinate and maintain construction control measures as required by the City of Ann Arbor. A City of Ann Arbor permitted construction control officer shall be on site at the beginning of construction.

4. The Contractor shall coordinate and maintain construction control measures as required by the City of Ann Arbor. A City of Ann Arbor permitted construction control officer shall be on site at the beginning of construction.

5. The Contractor shall coordinate and maintain construction control measures as required by the City of Ann Arbor. A City of Ann Arbor permitted construction control officer shall be on site at the beginning of construction.

6. The Contractor shall coordinate and maintain construction control measures as required by the City of Ann Arbor. A City of Ann Arbor permitted construction control officer shall be on site at the beginning of construction.

7. The Contractor shall coordinate and maintain construction control measures as required by the City of Ann Arbor. A City of Ann Arbor permitted construction control officer shall be on site at the beginning of construction.

8. The Contractor shall coordinate and maintain construction control measures as required by the City of Ann Arbor. A City of Ann Arbor permitted construction control officer shall be on site at the beginning of construction.

9. The Contractor shall coordinate and maintain construction control measures as required by the City of Ann Arbor. A City of Ann Arbor permitted construction control officer shall be on site at the beginning of construction.

10. The Contractor shall coordinate and maintain construction control measures as required by the City of Ann Arbor. A City of Ann Arbor permitted construction control officer shall be on site at the beginning of construction.

11. The Contractor shall coordinate and maintain construction control measures as required by the City of Ann Arbor. A City of Ann Arbor permitted construction control officer shall be on site at the beginning of construction.

12. The Contractor shall coordinate and maintain construction control measures as required by the City of Ann Arbor. A City of Ann Arbor permitted construction control officer shall be on site at the beginning of construction.

13. The Contractor shall coordinate and maintain construction control measures as required by the City of Ann Arbor. A City of Ann Arbor permitted construction control officer shall be on site at the beginning of construction.

14. The Contractor shall coordinate and maintain construction control measures as required by the City of Ann Arbor. A City of Ann Arbor permitted construction control officer shall be on site at the beginning of construction.

15. The Contractor shall coordinate and maintain construction control measures as required by the City of Ann Arbor. A City of Ann Arbor permitted construction control officer shall be on site at the beginning of construction.

16. The Contractor shall coordinate and maintain construction control measures as required by the City of Ann Arbor. A City of Ann Arbor permitted construction control officer shall be on site at the beginning of construction.

17. The Contractor shall coordinate and maintain construction control measures as required by the City of Ann Arbor. A City of Ann Arbor permitted construction control officer shall be on site at the beginning of construction.

18. The Contractor shall coordinate and maintain construction control measures as required by the City of Ann Arbor. A City of Ann Arbor permitted construction control officer shall be on site at the beginning of construction.

19. The Contractor shall coordinate and maintain construction control measures as required by the City of Ann Arbor. A City of Ann Arbor permitted construction control officer shall be on site at the beginning of construction.

20. The Contractor shall coordinate and maintain construction control measures as required by the City of Ann Arbor. A City of Ann Arbor permitted construction control officer shall be on site at the beginning of construction.

21. The Contractor shall coordinate and maintain construction control measures as required by the City of Ann Arbor. A City of Ann Arbor permitted construction control officer shall be on site at the beginning of construction.

22. The Contractor shall coordinate and maintain construction control measures as required by the City of Ann Arbor. A City of Ann Arbor permitted construction control officer shall be on site at the beginning of construction.

23. The Contractor shall coordinate and maintain construction control measures as required by the City of Ann Arbor. A City of Ann Arbor permitted construction control officer shall be on site at the beginning of construction.

24. The Contractor shall coordinate and maintain construction control measures as required by the City of Ann Arbor. A City of Ann Arbor permitted construction control officer shall be on site at the beginning of construction.

25. The Contractor shall coordinate and maintain construction control measures as required by the City of Ann Arbor. A City of Ann Arbor permitted construction control officer shall be on site at the beginning of construction.

26. The Contractor shall coordinate and maintain construction control measures as required by the City of Ann Arbor. A City of Ann Arbor permitted construction control officer shall be on site at the beginning of construction.

27. The Contractor shall coordinate and maintain construction control measures as required by the City of Ann Arbor. A City of Ann Arbor permitted construction control officer shall be on site at the beginning of construction.

28. The Contractor shall coordinate and maintain construction control measures as required by the City of Ann Arbor. A City of Ann Arbor permitted construction control officer shall be on site at the beginning of construction.

29. The Contractor shall coordinate and maintain construction control measures as required by the City of Ann Arbor. A City of Ann Arbor permitted construction control officer shall be on site at the beginning of construction.

30. The Contractor shall coordinate and maintain construction control measures as required by the City of Ann Arbor. A City of Ann Arbor permitted construction control officer shall be on site at the beginning of construction.

31. The Contractor shall coordinate and maintain construction control measures as required by the City of Ann Arbor. A City of Ann Arbor permitted construction control officer shall be on site at the beginning of construction.

32. The Contractor shall coordinate and maintain construction control measures as required by the City of Ann Arbor. A City of Ann Arbor permitted construction control officer shall be on site at the beginning of construction.

33. The Contractor shall coordinate and maintain construction control measures as required by the City of Ann Arbor. A City of Ann Arbor permitted construction control officer shall be on site at the beginning of construction.

34. The Contractor shall coordinate and maintain construction control measures as required by the City of Ann Arbor. A City of Ann Arbor permitted construction control officer shall be on site at the beginning of construction.

35. The Contractor shall coordinate and maintain construction control measures as required by the City of Ann Arbor. A City of Ann Arbor permitted construction control officer shall be on site at the beginning of construction.

36. The Contractor shall coordinate and maintain construction control measures as required by the City of Ann Arbor. A City of Ann Arbor permitted construction control officer shall be on site at the beginning of construction.

37. The Contractor shall coordinate and maintain construction control measures as required by the City of Ann Arbor. A City of Ann Arbor permitted construction control officer shall be on site at the beginning of construction.

38. The Contractor shall coordinate and maintain construction control measures as required by the City of Ann Arbor. A City of Ann Arbor permitted construction control officer shall be on site at the beginning of construction.

39. The Contractor shall coordinate and maintain construction control measures as required by the City of Ann Arbor. A City of Ann Arbor permitted construction control officer shall be on site at the beginning of construction.

40. The Contractor shall coordinate and maintain construction control measures as required by the City of Ann Arbor. A City of Ann Arbor permitted construction control officer shall be on site at the beginning of construction.

PERMITS REQUIRED TO BE OBTAINED BY THE CONTRACTOR PRIOR TO THE BEGINNING OF CONSTRUCTION.

1. PERMITS REQUIRED TO BE OBTAINED BY THE CONTRACTOR PRIOR TO THE BEGINNING OF CONSTRUCTION.

40. PERMITS REQUIRED TO BE OBTAINED BY THE CONTRACTOR PRIOR TO THE BEGINNING OF CONSTRUCTION.
**TYPE OF CASTING**

- Barrier Curb
  - inlet for 24 and 30 inch curb
- Manhole Frame & Cover
- Watertight Manhole Frame and Cover
- Monument Box

**NEEHAH FOUNDRY**

- R-3013B, Type S grate (500 Pounds)
- R-1642, Type C Cover (380 Pounds)
- N/A

**IRON WORKS**

- 7045, Type M1 grate (490 Pounds)
- 1040, Type A Cover (400 Pounds)
- 1040-WT (400 Pounds)
- 8360 (100 Pounds)

**NOTES:**

- Frames and covers must have machined bearing surfaces. Covers must have two (2) 1" vent holes at the center of the cover and two (2) 1/8"-10 x 1" holes in the surface, whichever is applicable.

- Frames and covers must have two (2) 1" vent holes at the center of the cover and two (2) 1/8"-10 x 1" holes in the surface, whichever is applicable.

- Frames and covers must have two (2) 1" vent holes at the center of the cover and two (2) 1/8"-10 x 1" holes in the surface, whichever is applicable.

- Frames and covers must have two (2) 1" vent holes at the center of the cover and two (2) 1/8"-10 x 1" holes in the surface, whichever is applicable.

- Frames and covers must have two (2) 1" vent holes at the center of the cover and two (2) 1/8"-10 x 1" holes in the surface, whichever is applicable.
