II. QUESTIONS AND ANSWERS

The following Questions have been received by the City. Responses are being provided in accordance with the terms of the ITB. Bidders are directed to take note in their review of the documents of the following questions and City responses as they affect work or details in other areas not specifically referenced here.

Question 1: Item 81-Calls for 8 MIL Poly-wrap…Do you want pricing for all sizes of Poly-wrap that can be used on items 71-80. Description is slightly vague.

Answer 1: Please provide pricing for 12”-14”, 30” lay flat.

Question 2: Items 303, 308, 313, 316 & 317 which are listed under Stainless Steel Repair Clamps…these look to be Tapping Sleeves.

Answer 2: These items are tapping sleeves for 6” wet taps.

Question 3: Items 396-425 (Couplings-Elastomeric) are these to be “Shielded” type? Specifications not listed in bid package.

Answer 3: The items are standard Ferncos,

Bidders are responsible for any conclusions that they may draw from the information contained in the Addendum.
PART 1 – GENERAL

(NOT USED)

PART 2 – PRODUCTS

2.1 DUCTILE IRON PIPE AND FITTINGS

A. Ductile iron pipe shall be push-on joint water main pipe meeting the requirements of ANSI/AWWA C151/A21.51 with double thickness cement mortar lining and asphaltic seal coat meeting ANSI/AWWA C104/A21.4 and coated outside with an asphaltic coating meeting ANSI/AWWA C151/A21.51. Pipe shall meet the thickness requirements of pressure class 350. Push-on joints shall be single gasket joints meeting AWWA specification C111. Pipe shall be manufactured by American, Clow, Griffin, or US Pipe and shipped complete with gasket.

B. Ductile iron fittings shall meet the requirements of ANSI/AWWA C153/A21.53 for compact fittings or ANSI/AWWA C110/A21.10 for full body fittings. Fittings shall have an internal cement-mortar lining and asphaltic seal coat in accordance with in accordance with ANSI/AWWA C104/A21.4. The outside of all fittings shall have an asphaltic coating.

1. Fittings shall be supplied complete with high strength, low alloy, blue colored, ceramic-filled fluorocarbon resin coated steel bolts and plain rubber mechanical joint gaskets.

C. Restraint devices for mechanical joint fittings shall consist of multiple gripping wedges incorporated into a follower gland meeting the applicable requirements of ANSI/AWWA C110/A21.10. The devices shall have a working pressure rating of 350 psi for 3” to 16” and 250 psi for 18” through 48” size. Restraint devices shall be Listed by Underwriters Laboratories (3” through 24” inch size) and Approved by Factory Mutual (3” through 12” inch size). Mechanical joint restraint shall be Megalug Series 1100 produced by EBAA Iron Inc. or approved equal.

2.2 FIRE HYDRANTS

A. Fire hydrants shall be EJ Watermaster 5BR250, bury depth as specified in the bid form, mechanical joint, traffic flange, open left, no barrel drain, a painted red finish, with one 3” National Standard hose connection and one 5” integral Storz connection, 1-3/8 inch pentagon operating and cap nuts shall be utilized (1-3/8 inch point-to-flat at top and 1-7/16 inch point-to-flat at base).

B. All hydrant parts shall be manufactured by EJ.

2.3 GATE VALVES

A. Resilient seated gate valves shall conform to the requirements of AWWA C509 or C515 and shall have an operator rated for buried service with 2 inch square opening nut, operating right. Gate valves shall be mechanical joint unless otherwise specified in the bid form. Mechanical joints shall meet the requirements of AWWA Specification C111. Gate valves shall be American Flow Control Series 2500, Mueller Series A-2360, EJ FlowMaster, U.S. Pipe A-USP2, Clow Model 2638/2639, or approved equal.
