SECTION II

SCOPE OF WORK

INTRODUCTION AND OVERVIEW

The City of Ann Arbor, Michigan, is seeking proposals from qualified consultants to perform a water and wastewater system capital cost recovery study. The study is intended to establish an equitable, understandable, defensible cost recovery philosophy and fee structure for customers connecting to the city’s water main and/or sanitary sewer systems.

The City’s approaches to cost recovery for the initial capital investment in its water and sanitary sewer systems have been modified over the past several years with the intention of more suitably recovering those costs, in present value amounts, from customers connecting for the first time to those utilities, thereby reducing the burden to the existing customer base of carrying that burden. Concerns have been raised regarding the affordability and methodology of the modified approaches. As a result, an ordinance was recently passed by City Council to amend Chapter 12 of City Code which establishes one of the City’s cost recovery components, improvement charges for water and sanitary sewer, are calculated. The code amendment was intended to be for an interim basis to allow for a capital cost recovery study to be performed.

GENERAL INFORMATION ON UTILITY

The City of Ann Arbor’s Public Services Area (AAPSA) is a municipal water utility that provides quality drinking water, sanitary sewage disposal, hydropower generation, and storm water services to a population of approximately 115,000 people within the City of Ann Arbor. AAPSA also provides water and sewer service to portions of Ann Arbor, Scio and Pittsfield Townships (population approximately 10,000). The entire AAPSA covers about 43 square miles and continues to attract residential and commercial development.

The City maintains and operates approximately 440 miles of water main, 370 miles of sanitary sewer, and has 22,478 residential connections and 5,843 commercial connections. Within the City’s utility service area, approximately 350 buildable vacant lots remain not including larger parcels which could be split in the future; as well as 550 township parcels which will ultimately be served with City water and sanitary service.

BACKGROUND ON IMPROVEMENT CHARGES AND COST RECOVERY

Prior to 2003, when water mains and/or sanitary sewers were constructed, the City special assessed each benefiting property in the City for their share of the particular project cost at the completion of the project. However for any township properties that would ultimately utilize the utility line, the City could not special assess those properties as they were outside of the City’s jurisdiction. As a result, the City funded their share of the project cost and continued to carry those expenses until the benefiting township property annexed to the City which could be many years later. At the time of annexation, the township property owners paid their historical
recorded shares of the project cost as approved by the City Council at the time of the project, without adjustment. Depending on the time of an annexation, the City may or may not have recovered its cost of temporarily financing the project. The City property owners on the other hand paid their fair share of the project cost from the beginning. Overall, project costs and associated assessment and improvement charges varied widely due to specific project conditions and time of annexation, thereby resulting in similarly situated parcels, receiving similar benefit, but receiving widely disparate improvement charges.

In 2003, City Code was amended to streamline the administration of the assessment and improvement charge process, establish equity of charges to new City parcels, improve the recovery of costs that are currently subsidized, reduce project timelines, and significantly improve communications with residents. The changes included the application of a “Fixed Improvement Charge” for the more frequently occurring improvement projects, i.e. the residential water main and residential sanitary sewer.

The Fixed Water and Sanitary Sewer Improvement Charge are determined each year by adding the cost of the ten most recent utility projects constructed by the City, adjusted to current costs, and dividing that by the total number of units served. The actual cost of each water main project is cost forwarded to today’s dollars using the Handy-Whitman Index for “Distribution Plant – Mains, Average All Types”. The same method is used for cost forwarding sanitary sewer projects except that the Engineering News Record Construction Cost Index is used for cost forwarding the project costs to today’s dollars.

The purpose of the 2003 code change was to recover the full cost of the water and sanitary sewer improvements without subsidy by current customers, including their future replacement, with properties paying the current cost of the improvement at the time of the connection through a Fixed Improvement Charge fee which is re-calculated annually.

In 2007, it was recognized that there were other connections to the city’s water and sanitary sewer systems where the city was not made whole for its capital, operating and replacement costs. City Code was then amended to include and accomplish the following:

a) Provided for individual vacant residential properties within the city to pay the improvement charge fixed charge at the time of its initial connection to the water and/or sanitary systems, with an adjustment to the amount owed based on the decade the main was constructed, recognizing that the property paid an initial share of the capital construction cost via special assessment, but has not yet contributed to the operation and replacement of the main.

b) Provided for vacant non-residential properties within the city which had an historical improvement charge for the main it is connecting to, to pay the difference in the previously paid improvement charge and the cost-forwarded amount of the improvement charge, again recognizing that the property paid an initial share of the capital construction cost but has not yet contributed to the operation and replacement of the main.

c) Provided for vacant non-residential properties that are connecting for the first time to an existing city main that did not have an historical improvement charge paid directly to the city, to pay an improvement charge based on the proposed usage of the system and the
costs of operating and replacing the system, recognizing that the property paid a share of the initial capital construction cost of the system through the land costs, but has not yet contributed to the operation and depreciation of the main.

d) Provided for both residential and non-residential units within a development that connect to water and sanitary sewer mains constructed as part of that same development, to pay improvement charges after two years of the main(s) having become part of the city utility system, for a period of eight years, recognizing that while the developer has contributed these mains to the city, the city has to operate and fund the replacement of those systems without funding contribution from these units until they are connected and paying utility rates.

The purpose of these changes were to shift the financial burden for recovery of the investment to serve, including operation and replacement of the water and sanitary sewer systems, from current utility customers to those future customers for whom the investment is made, at the time of their initial connection to the system.

BACKGROUND ON CONNECTION CHARGES AND RELATED CHARGES

The improvement charges described above cover the cost of the utility mains constructed to directly serve the property. There are other charges which are levied for each connecting property which cover the property's share of the system-wide costs and includes such things as the transmission mains, water treatment plant, and wastewater treatment plant, as well as recover the city's cost for work and material to connect the home to the mains. There are several components to these charges and the costs depend upon the size of the connections (the larger the connection the greater the demand that is placed on the systems, and thus the higher cost). These charges include the following: sanitary sewer connection charge; sanitary sewer tap fee; water connection charge; water meter fee; and, water tap fee.

A connection charge fee schedule was implemented in 2004 and the corresponding fee depends on the size of the “water tap,” which is the diameter of the water service line from the water main to the building. Prior to 2004, similar, but smaller in scale charges were in place called “water permit charge” and “sewer permit charge” and were based on the size of the water meter.

The connection charge fee schedule is currently based on the cross sectional area of the water tap with the assumption that the flow capacity for any given connection is limited by the cross sectional area of its service lead.

   d. Permit charges (pre-connection charges; no longer in use)
   e. Tap charges
   f. Meter set fees

   b. Review timing for when capital costs are levied (i.e., at time of main installation versus time of connection/when utility service is taken)
   c. In communities where the capital costs are levied at the time of connection/when utility service is taken, review if other communities cost forward to bring capital charges current.
   d. In communities where the capital costs are levied at the time of main installation, review whether and how communities fund the system replacement costs for a property that is not yet connected, or between the time of installation and connection
   e. Review how other communities fund ultimate system replacement (i.e., is it done outside of water and sewer rates)
   f. Review AWWA guidance documents on fee development and incorporate recommendations into proposed approach, if applicable
g. Review whether any of the fees or charges has been challenged and the outcome of such challenge, recognizing that there may be both similarities and differences in applicable law between Michigan and other states.

C. Recommend methodology and fee schedule of charges for connections to water main & sanitary sewer systems meeting goal identified above in introduction and overview section

a. Assess current fee structures including, but not limited to, improvement charges, connection charges, meter set fees and tap fees

c. Develop explicit set of fees (excluding rates) to modify or replace existing fees, including, but are not limited to, improvement charges, connection charges, meter set fees and tap fees
d. Consider ways to simplify the fee structure through consolidation of fees
e. Create a transition plan for implementing new fee structure
f. Provide recommendations regarding necessary cost accounting, calculations, and data collection to support future updates to the proposed fee schedules

  - Fact sheet available for public distribution in paper and electronic copy
  - Project website

o Consultant shall engage at a minimum the following focus groups throughout the project:
  - Existing commercial and residential rate payers
  - Developers and Builders including University of Michigan & Ann Arbor Public Schools

o Consultants should consider any or all of the following elements in their “Public Engagement Strategy”:
  - Press release, Email Distribution, Social media, Tree Town Log, City meetings, A2 City News Resident newsletter, WaterMatters Newsletter,
Public Meeting Display Case at Larcom City Hall, Educational Materials, Project Web Page, Project Newsletter/Fliers, Direct Mail/Flier Distribution, Online Survey, Presentation at Commission Meetings, Presentations to Groups, Council/Administrator Communications, Working Sessions, Public Meetings, Feedback Forms, Citywide Meetings, Community Workshops

- Consultant may utilize a third party communication vehicle at the discretion of the City
- Consultant shall document all outreach and engagement activities in a written, summary document. This includes the documentation of all meetings, one-on-one interviews, phone calls, email exchanges, and any additional public outreach activities
- During the course of the study there is the potential for up to three presentations to City Council. The consultant shall prepare presentations and have someone in attendance at each meeting to discuss any components of the study, summarize public comments, and prepare minutes from these meetings.
SECTION III
MINIMUM INFORMATION REQUIRED

Respondents should organize Proposals into the following Sections:

A. Professional Qualifications
B. Past Involvement with Similar Projects
C. Proposed Work Plan
D. Fee Proposal (include in a separate sealed envelope clearly marked “Fee Proposal”)
E. Authorized Negotiator
F. Appendices

The following describes the elements that should be included in each of the proposal sections and the weighted point system that will be used for evaluation of the proposals.

A. Professional Qualifications – 15 points

1. State the full name and address of your organization and, if applicable, the branch office or other subordinate element that will perform, or assist in performing, the work hereunder. Indicate whether it operates as an individual, partnership, or corporation. If as a corporation, include whether it is licensed to operate in the State of Michigan.

2. Include the name of executive and professional personnel by skill and qualification that will be employed in the work. Show where these personnel will be physically located during the time they are engaged in the work. Indicate which of these individuals you consider key to the successful completion of the project. Identify only individuals who will do the work on this project by name and title. Resumes and qualifications are required for all proposed project personnel, including all subconsultants. Qualifications and capabilities of any subconsultants must also be included.

3. State history of the firm, in terms of length of existence, types of services provided, etc. Identify the technical details which make the firm uniquely qualified for this work.

B. Past involvement with Similar Projects – 20 points

The written proposal must include a list of specific experience in the project area and indicate proven ability in developing detailed designs and implementing similar projects for the firm and the individuals to be involved in the project. The proposal should also indicate the ability to have projects completed within the budgeted amounts. A summary of related projects with the original deadline and cost estimate versus the actual design completion date and final cost of the design is required with this section. A complete list of client references must be provided for similar projects recently completed. It shall include the firm/agency name, address, telephone number, project title, and contact person.
C. **Proposed Work Plan – 50 points**

A detailed work plan is to be presented which lists all tasks determined to be necessary to accomplish the work of this project. The work plan shall define resources needed for each task (title and individual person-hours) and the firm’s staff person completing the project task. In addition, the work plan shall include a timeline schedule depicting the sequence and duration of tasks showing how the work will be organized and executed.

1. The work plan shall be sufficiently detailed and clear to identify the progress milestones (i.e., when project elements, measures, and deliverables are to be completed) and the extent and timing of the City personnel involvement. Additional project elements suggested by the Proposer are to be included in the work plan and identified as Proposer suggested elements.

2. The work plan must identify information the Proposer will need from City staff in order to complete the project. Include estimated time and resource commitment from City staff.

3. The work plan shall include any other information that the Proposer believes to be pertinent but not specifically asked for elsewhere.

4. Also include in the work plan all proposed steps, if any, to expedite completion of the project. This will be given due consideration during evaluation of proposals.

In the scoring for this section, consultants shall be evaluated on the clarity, thoroughness, and content of their responses to the above items.

D. **Fee Proposal – 15 points**

1. Fee quotations shall be submitted in a separate, sealed, envelope as part of the proposal. Fee quotations are to include the names, title, hourly rates, overhead factors, and any other details, including hours of effort for each team member by task, and sub-task, by which the overall and project element costs have been derived. The fee quotation is to relate in detail to each item of the proposed work plan. Consultants shall be capable of justifying the details of the fee proposal relative to personnel costs, overhead, how the overhead rate is derived, material and time.

2. The fee proposed must include the total estimated cost for the project when it is 100% complete. This total may be adjusted after negotiations with the City and prior to signing a formal contract, if justified. A sample of the required City/Consultant agreement form is included as Attachment A in Section IV of this RFP.

E. **Authorized Negotiator**

1. Include the name, phone number, and e-mail address of persons(s) in your organization authorized to negotiate the Scope of Work with the City.

F. **Attachments**

1. **Legal Status of Proposer, Living Wage Compliance Form and the Contract Compliance Form must be completed and returned with the proposal.** These elements should be included as attachments to the proposal submission.
G. Proposal Evaluation

1. The Selection Committee will evaluate each proposal by the above described criteria and point system (A through C, based on 85 points) to select a short list of firms for further consideration. The City reserves the right to not consider any proposal which it determines to be unresponsive and deficient in any of the information requested for evaluation. A proposal with all the requested information does not guarantee the proposing firm to be a candidate for an interview. The Committee may contact references to verify material submitted by the Proposers.

2. The Committee then will schedule the interviews with the selected firms if necessary. The selected firms will be given the opportunity to discuss in more detail their qualifications, past experience, proposed work plan and fee proposal. The interview must include the project team members expected to complete a majority of work on the project, but no more than 4 members total. The interview shall consist of a presentation of up to forty-five (45) minutes by the Proposer, including the person who will be the project manager on this Contract, followed by approximately forty-five (45) minutes of questions and answers. Audiovisual aids may be used during the oral interviews. The oral interviews may be recorded on tape by the Evaluation Team.

3. The firms interviewed will then be re-evaluated by the above criteria (A through D), and adjustments to scoring will be made as appropriate. After evaluation of the proposals, further negotiation with the selected firm may be pursued leading to the award of a contract by City Council, if suitable proposals are received.

The City reserves the right to not consider any proposal which is determined to be unresponsive and deficient in any of the information requested for evaluation. The City also reserves the right to waive the interview process and evaluate the consultants based on their proposals and fee schedules alone.

The City will determine whether the final scope of the project to be negotiated will be entirely as described in this Request for Proposal, a portion of the scope, or a revised scope.

INSTRUCTIONS FOR CONTRACTORS

For Completing CONTRACT COMPLIANCE FORM

City Policy

The "non discrimination in contracts" provision of the City Code, (Chapter 112, Section 9:161) requires contractors/respondents/grantees doing business with the City not to discriminate on the basis of actual or perceived race, color, religion, national origin, sex, age, condition of pregnancy, marital status, physical or mental limitations, source of income, family responsibilities, educational association, sexual orientation, gender identity or HIV status against any of their employees, any City employee working with them, or any applicant for employment. It also requires that the contractors/respondents/grantees include a similar provision in all subcontracts that they execute for City work or programs.

This Ordinance further requires that each prospective contractor/respondent submit employment data to the City showing current total employee breakdown by occupation, race and gender.
