SECTION II - SCOPE OF SERVICES

1. Overview and Background

The City of Ann Arbor has long provided a broad-based set of programs for managing its citizens and customers solid waste resources, including recyclable and compostable materials, in an environmentally focused manner, which is desired by community. The goals of these programs have been outlined through past planning efforts, the most recent being the *Waste Less: Solid Waste Resource Plan 2013-2017*, which identifies ways for the community to move towards the Zero Waste goal that was adopted by the City's Environmental Commission in 2007.

The programs implemented by the City have been provided over the years through both City forces and contracted services, funded primarily by a local Solid Waste Millage. Over time there has been an interest and desire for enhanced or expanded services within the solid waste programs area; yet at the same time costs within the program area continue to increase, such as legacy costs associated with the City's former landfill, City retiree costs, and aging program facilities, including the City's Material Recovery Facility (MRF) and Drop-Off Station. Thus, the City is seeking a strategic approach to determine how best to provide effective solid waste area services and programs to the community that meet the needs and desires of the community, in a financially sustainable manner.

This strategic approach is to be developed for a five-year planning period of 2019-2023 working within the established goal of a zero-waste framework. In addition, the approach is to be developed within the context of the recent Washtenaw County Solid Waste Management Plan Amendment, which among its goals includes:

- Reduce the overall amount of municipal solid waste (MSW) generated per capita in Washtenaw County by 5% in the year 2022 and by 10% in the year 2027, with a target of working towards zero waste.
- Operate collaboratively within the County and regionally outside of the County for a comprehensive sustainable materials management strategy.

2. Key Work Plan Elements

The consultant shall include as a minimum the following key elements in their proposed work plan. Other items may be suggested by the consultant to further meet the stated overview and background goals of this effort, and these will be reviewed by the City for consideration to be included in the final scope of work.

Documentation Review

In order to gain the broader regional context for this plan, the consultant shall gain background and understanding of recent and current planning efforts by Washtenaw County in areas that directly relate to, or impact, the City's solid waste programs by performing a review of pertinent documents, including:

- *Washtenaw County Solid Waste Management Plan Amendment*
- *Waste Diversion Site Feasibility Study: An Assessment of Recovery Facilities to Manage Recyclables*
- Results of Washtenaw County's Examination of Potential for Regional Approach to Recycling and Solid Waste (anticipated March 2018)

The consultant shall assess the current state of the City's Solid Waste Programs through review of the following:

- City's Solid Waste Financial Plan
- City's Comprehensive Annual Financial Report
- City's Current Service Operating Model
- City Solid Waste Program contracts for Recycle, Compost and Trash
- Current capital improvements/needs identified in the City's Capital Improvements Plan (CIP)
- Status of existing goals contained in *Waste Less: City of Ann Arbor Solid Waste Resource Plan Update 2013-2017*
- Recent and current City planning efforts and initiatives, including:
 - *City of Ann Arbor Sustainability Framework*
 - *Comprehensive Organics Management Plan*
 - *Climate Action Plan*
 - *Biodigester Feasibility Study*
 - *Multi-Family Recycling Incentive Pilot Program Report*

Community Engagement

The City desires a robust community engagement process as part of the development of the Solid Waste Resource Management Plan. It is vital to obtain stakeholder input in identifying goals for the solid waste programs, developing the plan, and to the extent possible, building community consensus on recommendations contained in the plan. Community engagement during the plan development will contribute to delivering an implementable Solid Waste Resource Management Plan. The consultant's proposed work plan is to include a community engagement strategy that ensures that the varied community stakeholders are appropriately represented and engaged throughout the process.

Identify and Evaluate Opportunities and Recommendations

With the understanding and context gained in the *Document Review* element of the work and utilizing the community engagement process, the consultant is to identify and evaluate potential opportunities and recommendations for the Solid Waste Resource Management Plan. Through its current operation and management of the current solid waste area programs, the City has identified interest in examination of the following specific items as part of this element of the plan:

- Downtown Alleys
 - Benchmark approaches and methods used by other cities with similar layout and programs in their downtown/core areas
 - Review current City approaches/methods
 - Recommend improvements/adjustments to service delivery in the downtown
- FOG (Fats, Oils and Grease)
 - Benchmark approaches and methods used by other cities to manage/control FOG
 - Review current City ordinances and regulations
 - Recommend approach to dealing with FOG
- Education and Outreach
 - Review City's current education and outreach methods
 - Recommend education and outreach strategies for improved, more effective education and outreach, recognizing:
 - The transient nature of the City's residents (students, rentals)
 - The transient nature of commercial customers (businesses, and staff at established businesses)
- Ordinances and Regulations
 - Review existing City Solid Waste Code Chapter 26 as well as City and State Regulations
 - Identify any inconsistencies/conflicts within existing City Code, and inconsistencies/conflicts between City Code and regulations
 - Identify any modifications needed to code and/or regulations to implement the plan Goals or Recommendations

Identify Logistics and Resource Needs to Implement Recommendations

The consultant is to perform an analysis quantifying the logistics and resources needed to implement any potential programs or recommendations included in the plan. This analysis is to include personnel/staffing resources, timing/duration required and funding necessary for development, initial implementation, and if applicable sustained operation and management of the programs and recommendations.

3. **Desired Qualifications**

The successful consultant will have excellent listening, speaking, facilitation, financial and program planning, and writing skills. The candidate must demonstrate a high

level of ability in gathering and synthesizing a significant amount of technical information, and be able to translate broad, financial and programmatic solid waste management concepts into laypersons' terms.

4. **Timeline**

The work effort is expected to begin in March/April 2018 with an anticipated duration of 12 – 15 months. The consultant's proposal is to be based on this duration for the work.

- C. Absent a written waiver, no act, failure, or delay by a Party to pursue or enforce any rights or remedies under this Agreement shall constitute a waiver of those rights with regard to any existing or subsequent breach of this Agreement. No waiver of any term, condition, or provision of this Agreement, whether by conduct or otherwise, in one or more instances, shall be deemed or construed as a continuing waiver of any term, condition, or provision of this Agreement.
