SECTION II - SCOPE OF SERVICES

1. Background

The Water Treatment Services Unit has almost 20 different building envelopes and roofing systems throughout the City, including the Water Treatment Plant (WTP), hydroelectric dam powerhouses and pump stations. The building envelopes and roofing systems are all different vintages and materials of construction. The roof systems and building envelopes exist in various conditions ranging from poor to satisfactory. The WTP buildings are comprised of original 1938 construction and various expansions completed in 1949, 1965, 1974, 1996, 2008 and 2014.

In 2006, the City completed the first phase of an architectural and structural repair project. The project consisted of structural concrete repairs and replacement, primarily at the Plant 1 flocculation and sedimentation basins, including wall, beam and elevated slab repair and replacement, architectural masonry repair and reconstruction, including tuck-pointing, brick replacement, re-setting of coping stones and flashing replacement as well as caulking and sealants for select windows, doors and building panels.

In 2017, the City hired a consultant to complete a Roofing Evaluation and Building Envelope (Masonry) Evaluation of the WTP buildings and five (5) outstations. The roofing evaluation consisted of reviewing of existing drawings and documents, a visual inspection of the roof systems, core samples and an infrared survey to investigate the insulation condition. The masonry evaluation consisted of a review of existing drawings, detailed inspection of masonry, joints, lintels and related items, as well as exploratory masonry investigation by dismantling small sections in the field.

These evaluations documented the assessed condition of each building as well as prioritized recommendations for repair or replacement based on severity and strategic construction sequencing. The evaluations include a summary of the consultants' findings, including descriptions of the various materials and styles of construction of the roofing and wall systems. General findings from the roofing evaluation indicated that many of the roof systems are in poor to very poor condition. General findings from the masonry evaluation were the brick masonry at the newer WTP buildings and outstations appear to be in good condition and fair to poor condition at the buildings constructed in 1949 or earlier. Typical masonry defects consist of cracked/spalled masonry units, cracked and missing mortar, deteriorated bed and head joints at limestone coping, as well as failed and deteriorated sealant.

Resulting from the evaluation phase, five (5) separate Projects were delineated by grouping the recommended repairs based on priority and available funding to allow for a phased approach to implementing construction.

Copies of these reports, as well as the 2006 Structural Repairs Project record drawings, can be made available for viewing at the Water Treatment Plant, 919 Sunset
2. **Objective**

The purpose of this Request for Proposal (RFP) is to select a Consultant to provide professional services to:

- Review existing roofing and building envelope (masonry) evaluations and perform preliminary investigation and field work as necessary to verify/confirm previous evaluation findings and recommendations.
- The goal of the repairs is to restore the WTP facilities to structural soundness and prolong useful life while maintaining overall general appearances (color, style, details, materials, etc.).
- Develop final set of recommendations and detailed plan for delineating work into separate projects consistent with the prioritized Projects identified in the previous roofing and masonry evaluations.
- Provide interior design services for the renovation of select portions of the WTP, including the administration building and portions of the second floor corridor/office area. For the interior design portion of the work, the consultant may either self-perform this work, if qualified, or subcontract this work with an experienced firm.
- Provide detailed design of WTP roof and masonry repairs, as well as interior renovations, including preparation of drawings, specifications and bid forms to advertise bid package(s) to Contractors.

3. **Scope of Work/Requirements**

A. **Strategy:**

   a. Funding for the architectural and structural repairs to the WTSU buildings' roof systems and building envelope are included in the City's Capital Improvements Plan (CIP). However, these funds are limited and availability of funds varies based fiscal year.

   b. As part of the roofing and masonry evaluations, recommended repairs were prioritized and grouped into Projects in the “Roofing and Masonry Combined Project Summary”. Therefore, the City is approaching implementation of the WTP Architectural and Structural Repairs using the prioritized Projects as the basis for how portions of the work will be separately bid for construction. The five (5) projects, as grouped in the evaluation, are summarized in the table below:
<table>

*After evaluation phase, City reviewed prioritization and placed work under different Project.

c. Construction of individual Projects will be based on available funds over the corresponding fiscal year(s) in accordance with City’s Capital Improvements Plan (CIP).
d. **This RFP includes the complete design of all five Projects.** The Consultants design shall clearly delineate between the separate Projects in the drawings and specifications.

f. Each Project may be constructed as a separate phase of construction. However, it is possible that more than one Project will be constructed in a given phase, if funding allows.
g. The City expects that there will be a single General Contractor (GC) for construction and may be a masonry, roofing, or general contractor. The GC shall manage masonry and roofing work including coordination of sequencing and overall schedule.
h. The City may choose to bid the work associated with the interior renovations design separate from the roof and masonry repairs. Therefore, Consultant
shall be prepared to package the specifications and drawings separately from the roof and masonry repairs.
i. The City reserves the right to modify this strategy based on available funding and CIP updates.

   i. Confirm and/or revise prioritized grouping of recommended work into Projects as laid out in evaluation phase summary.
      1. Include construction sequencing plan and estimates of total construction cost for each Project.
      2. If recommendations and plan deviate from that laid out in the evaluation phases, rationale and supporting information shall be presented in a technical memorandum for City review and discussion.
e. Consultant shall present final set of recommendations, including construction approaches and procedures, as well as preliminary construction sequencing plan and cost estimates, to the City in a technical memorandum for consensus prior to beginning detailed design. The memorandum will also serve as a record of design decisions and rationale.

C. Testing (Alternate No. 1)
a. Consultant may find it necessary or desired to perform additional testing to determine which type of repair methods are required, as well as the extents of the work.
b. These testing efforts shall be described in the proposal and separate costs for such efforts provided in the Fee Proposal as Alternate No. 1.

### F. Attachments

Legal Status of Consultant, Conflict of Interest Form, Living Wage Compliance Form, Non-Discrimination Form, and the Non-Disclosure Agreement must be completed and returned with the proposal. These elements should be included as attachments to the proposal submission.

### PROPOSAL EVALUATION

1. The selection committee will evaluate each proposal by the above-described criteria and point system (A through C) to select a short-list of firms for further consideration.
The City reserves the right to reject any proposal that it determines to be unresponsive and deficient in any of the information requested for evaluation. A proposal with all the requested information does not guarantee the proposing firm to be a candidate for an interview. The committee may contact references to verify material submitted by the consultants.

2. The committee then will schedule interviews with the selected firms if necessary. The selected firms will be given the opportunity to discuss in more detail their qualifications, past experience, proposed work plan and fee proposal.

3. The interview must include the project team members expected to complete a majority of work on the project, but no more than six members total. The interview shall consist of a presentation of up to thirty minutes (or the length provided by the committee) by the consultant, including the person who will be the project manager on this contract, followed by approximately thirty minutes of questions and answers. Audiovisual aids may be used during the oral interviews. The committee may record the oral interviews.

4. The firms interviewed will then be re-evaluated by the above criteria (A through C), and adjustments to scoring will be made as appropriate. After evaluation of the proposals, further negotiation with the selected firm may be pursued leading to the award of a contract by City Council, if suitable proposals are received.

The City reserves the right to waive the interview process and evaluate the consultants based on their proposals and fee schedules alone and open fee schedules before or prior to interviews.

The City will determine whether the final scope of the project to be negotiated will be entirely as described in this RFP, a portion of the scope, or a revised scope.

Work to be done under this contract is generally described through the detailed specifications and must be completed fully in accordance with the contract documents.

Any proposal that does not conform fully to these instructions may be rejected.

**PREPARATION OF PROPOSALS**

Proposals should have no plastic bindings but will not be rejected as non-responsive for being bound. Staples or binder clips are acceptable. Proposals should be printed double sided on recycled paper. Proposals should not be more than 30 sheets (60 sides), not including required attachments and resumes.

Each person signing the proposal certifies that he or she is the person in the consultant’s firm/organization responsible for the decision as to the fees being offered in the Proposal and has not and will not participate in any action contrary to the terms of this provision.
ADDENDA

If it becomes necessary to revise any part of the RFP, notice of the addendum will be posted to Michigan Inter-governmental Trade Network (MITN) www.mitn.info and/or the City of Ann Arbor web site www.A2gov.org for all parties to download.

Each consultant must acknowledge in its proposal all addenda it has received. The failure of a consultant to receive or acknowledge receipt of any addenda shall not relieve the consultant of the responsibility for complying with the terms thereof. The City will not be bound by oral responses to inquiries or written responses other than official written addenda.

No waiver of any term, condition, or provision of this Agreement, whether by conduct or otherwise, in one or more instances, shall be deemed or construed as a continuing waiver of any term, condition, or provision of this Agreement.
