SECTION I - GENERAL INFORMATION

A. OBJECTIVE

The City of Ann Arbor is seeking the services of a firm to upgrade four programmable logic controllers (PLCs) in the Wastewater Treatment Plant (WWTP) Tertiary Filter Building. The current PLCs are Allen-Bradley PLC 5/40 and we intend to replace them with Allen-Bradley ControlLogics model 1756-L73 with minimum 8MB of memory. If the Consultant has reason to suggest an alternative PLC model for Ann Arbor’s needs, please provide pricing and explanation for the alternate. The PLCs require replacement due to their age and the lack of availability of replacement parts needed to keep them in service. Three PLCs are associated with operation of the Tertiary Filters and one is located in the Filter Control Room. The firm is to perform an evaluation of the existing PLCs and provide, install and integrate the new PLCs with the existing Factory TalkView SE v.12 HMI control system. For the control strategy, the consultant will utilize the existing PLC programming files and obtain preferences and opinions from plant supervisors.

SECTION II - SCOPE OF SERVICES

1. Background

The City of Ann Arbor Wastewater Treatment Plant (WWTP) currently uses PLCs to operate and control twelve sand filters used for tertiary treatment of wastewater. The existing PLCs are Allen-Bradley PLC 5/40E. The processors are connected to the Factory TalkView SE v.12 Process Instrumentation & Control System (PICS) for process control. There are four PLC panels in the Tertiary Filter Building. One PLC is located in Control Panel CP 70 in the Tertiary Filter Building Control Room and three PLCs referred to as Filter Processor Panels FPP-A, FPP-B, and FPP-C are located in the filter floor hallway.

The existing PLC-5/40E PLCs and touch screens are becoming obsolete and expensive to maintain. This project will remove the four existing PLC-5/40E PLCs and associated IO modules, IO racks, terminal blocks, cabling system connected to the existing IO module and provide four new ControlLogix controllers which can support PlantPAX 3.0, with associated IO modules, terminal blocks and cabling system. This work also includes programming the new controllers utilizing current ControlLogix controller programming standard and prefer utilizing RSLogix 5000 V20.1 because that is our latest firmware are used, connecting with the existing Factory TalkView SE v.12 HMI, and modifying or recreating tertiary process screens, alarms and data logging to the existing Historian server. Add all new ControlLogix controller to our existing Asset Centre. All four new processors will tie to the existing network switch located inside the CP 70 panel in the Tertiary Filter Building Control Room.

Programming shall be completed offline prior to removing any existing components. The final transition to the upgraded system shall be completed in one 8-hour workday. Existing infrastructure shall be maintained throughout the project and shall be capable of being reinstalled with full functionality in the event the upgrade cannot be completed in one work day.

Photos of the four existing PLCs are provided for reference in Attachment A. Panel drawings for CP 70, located in the Tertiary Filter Building Control Room, are also provided for reference in Attachment A. Note, that only one of the two PLCs shown on CP 70 panel drawings provided in Attachment A remains. One PLC was removed and not replaced approximately 10 years ago.
3. Requirements

This Project shall include the following requirements:

- Remove and replace the existing PLCs and remove the touch screens and provide covers over the touch screen cutouts. Remote access into the City of Ann Arbor’s PICS system will not be allowed. All work is to be performed onsite when connected to the City system for upgrading and programming. During PLC installation, programming and startup, six of the 12 tertiary filters must remain in service at all times.

- The Consultant shall be Rockwell Certified or engage the services of a Rockwell Certified Integrator to perform the work.

- The Consultant shall submit a proposed schedule for PLC replacement, programming and startup services that includes the number of meetings with City of Ann Arbor staff. Also, as part of their proposal, the Consultant shall submit a list of expectations for City of Ann Arbor staff in terms of work tasks and estimated level of effort during PLC replacement work.

5. Umbrella/Excess Liability Insurance shall be provided to apply in excess of the Commercial General Liability, Employers Liability and the Motor Vehicle coverage enumerated above, for each occurrence and for aggregate in the amount of $1,000,000.
B. Insurance required under A.3 and A.4 above shall be considered primary as respects any other valid or collectible insurance that the City may possess, including any self-insured retentions the City may have; and any other insurance the City does possess shall be considered excess insurance only and shall not be required to contribute with this insurance. Further, the Contractor agrees to waive any right of recovery by its insurer against the City for any insurance listed herein.

C. Insurance companies and policy forms are subject to approval of the City Attorney, which approval shall not be unreasonably withheld. Documentation must provide and demonstrate an unconditional and unqualified 30-day written notice of cancellation in favor of the City of Ann Arbor.
