6. The City reserves the right to select one or more consultants to perform services.
7. The City reserves the right to retain all proposals submitted and to use any ideas in a proposal regardless of whether that proposal is selected. 8. The City reserves the right to disqualify proposals that fail to respond to any requirements outlined in the RFP, or failure to enclose copies of the required documents outlined within RFP.
SECTION II - SCOPE OF WORK

The City is currently accepting proposals to perform soil borings and pavement cores at various locations and depths throughout the City. The work for this contract will be on an “as needed” basis. The selected firm(s) will be awarded a contract for a fixed amount, and the City will request work as it is required.

Many of the borings requested through this contract will likely consist of 5-foot deep borings for road resurfacing/reconstruction projects. In addition, there will likely also be deeper borings for utility replacement and stormwater infiltration projects. Most of the borings will be located within, or adjacent to, public streets.

The City may also request that environmental drilling or direct push drilling be performed at sites of known or suspected contamination.

It is the City’s intent to bundle work together as much as possible to reduce mobilization and overhead costs, however some requests for work may still need to be performed separately as needed. For purposes of this contract, a “bundle” will be defined as each request for work from the City. The City may request an estimate on each bundle of work prior to beginning the work. Such estimates shall be performed at no cost to the City.

The work to be performed by the selected firm(s) shall include:

• Performing soil borings in locations as directed by the City. Each soil boring shall include pavement cores in order to determine existing pavement thickness. This shall also include coring through any concrete pavement or base that may be encountered. Soil borings will extend to the depth indicated, as measured from the top of the existing pavement.

• Careful measurement and recording on the boring logs of all pavement and aggregate base thicknesses. The composition and description of the aggregate base shall also be reported on the boring logs (i.e. natural aggregate or crushed limestone). Sufficient samples of aggregate base and sand subbase materials shall be obtained in order to perform sieve analysis testing if requested by the City.

• Continuous sampling on all soil borings for the first 2½ feet below the existing pavement surface.

• Measuring and recording the distance of the actual boring location from the nearest curb line and from another permanent feature (such as a drainage structure, driveway opening, etc). Sampling locations will be marked in the field by a representative of the City of Ann Arbor. Boring locations shall not be offset for reasons other than avoiding conflicts with existing utilities, parked cars, trees, or other unmovable obstacles.

• Preparing boring logs describing in detail the soil types encountered and results of laboratory analysis, as well as the locations of the soil borings and cores.
• Preparing a geotechnical report describing the results of the soils investigation and making recommendations as appropriate. The geotechnical report will also provide a summary table of the soil boring results, which shall include, at a minimum, the street name and limits, range of asphalt thicknesses encountered, thickness and description of base course encountered, a brief description of subgrade soils, estimated Resilient Modulus, and analysis of any laboratory results. One report shall be prepared per “bundle” of projects, as requested by the City.

• Any laboratory testing required to provide comprehensive soil boring logs and/or geotechnical reports. This shall include, at a minimum, visual engineering classification of all samples (in accordance with the USCS) as well as moisture content and soil strength tests on cohesive samples. All core thicknesses shall be measured in the laboratory to verify measurements obtained in the field. Laboratory testing shall be included in the cost of the soil borings.

• Additional laboratory testing as requested by the City, such as gradation analysis or permeability.

• Obtaining the proper permits from the City of Ann Arbor and supplying the necessary traffic control during drilling operations. The selected firm will need to obtain Right Of Way Permits and Lane Closure Permits (when necessary) from the City of Ann Arbor. The fees for these permits shall be waived. If necessary, the Consultant shall rent parking meter bags (at the Consultant’s cost) to assure access to soil borings in areas where parking meters are present.

• Performing environmental soil borings or direct push drilling at sites of known or suspected contamination. Environmental drilling, which requires the drill rig, augers and other equipment to be decontaminated prior to drilling operations, shall be done in accordance with EPA standards.

• Performing environmental direct push drilling (i.e. Geoprobe), which uses a percussion hammer to push and vibrate into the ground, instead of rotating. The soil samples shall be collected in 5’ plastic liners, so that volatile organics are not exposed to the atmosphere, resulting in better analysis.

• Preparing a site specific environmental work plan and Health and Safety plan for the City’s review and approval prior to performing environmental soil borings or direct push drilling at sites of known or suspected contamination.

• Collecting of soil and groundwater samples suitable for submittal for analytical evaluation for PNAs, VOCs, metals or other analysis requested by the City. These samples, including trip blanks, shall be collected and delivered to City staff or a suitable laboratory using the standard chain of custody protocols.

• Implementation of traffic control for all major streets in conformance with the most current edition of the Michigan Manual of Uniform Traffic Control Devices (MMUTCD).
• All services shall be performed in compliance with all applicable EPA, ASTM, MDOT, and City Standards and Specifications, and shall be performed under the direction of a Michigan-registered professional engineer, employed by the selected firm.

The City does not guarantee either a minimum volume of work or a specific volume of work if a contract is awarded.

PROPOSAL EVALUATION

1. The selection committee will evaluate each proposal by the above-described criteria and point system (A through B, based on 100 points) to select a firm(s). The City reserves the right to reject any proposal that it determines to be unresponsive and deficient in any of the information requested for evaluation. A proposal with all the requested information does not guarantee the proposing firm to be a candidate for an interview. The committee may contact references to verify material submitted by the consultants.

2. The committee then will schedule the interviews with the selected firms if necessary. The selected firms will be given the opportunity to discuss in more detail their qualifications, past experience, proposed work plan and fee proposal.

3. The interview must include the project team members expected to complete a majority of work on the project, but no more than six members total. Audiovisual aids may be used during the oral interviews. The committee may record the oral interviews.

4. The firms interviewed will then be re-evaluated by the above criteria (A through B), and adjustments to scoring will be made as appropriate. After evaluation of the proposals, further negotiation with the selected firm may be pursued leading to the award of a contract by City Council, if suitable proposals are received.

The City also reserves the right to waive the interview process and evaluate the consultants based on their proposals and fee schedules alone.

The City will determine whether the final scope of the project to be negotiated will be entirely as described in this RFP, a portion of the scope, or a revised scope.

Work to be done under this contract is generally described through the detailed specifications and must be completed fully in accordance with the contract documents.
Any proposal that does not conform fully to these instructions may be rejected.

VIII. WARRANTIES BY THE CONTRACTOR

A. The Contractor warrants that the quality of its Services under this Agreement shall conform to the level of quality performed by persons regularly rendering this type of service.

Notwithstanding any consent by the City to any assignment, Contractor shall at all times remain bound to all warranties, certifications, indemnifications, promises and performances, however described, as are required of it under the Agreement unless specifically released from the requirement, in writing, by the City.

B. The Contractor shall retain the right to pledge payment(s) due and payable under this Agreement to third parties.

XI. TERMINATION OF AGREEMENT

A. If either party is in breach of this Agreement for a period of fifteen (15) days following receipt of notice from the non-breaching party with respect to a breach, the non-breaching party may pursue any remedies available to it against the
breaching party under applicable law, including but not limited to, the right to terminate this Agreement without further notice. The waiver of any breach by any party to this Agreement shall not waive any subsequent breach by any party.

B. The City may terminate this Agreement, on at least thirty (30) days advance notice, for any reason, including convenience, without incurring any penalty, expense or liability to Contractor, except the obligation to pay for Services actually performed under the Agreement before the termination date.

C. Contractor acknowledges that, if this Agreement extends for several fiscal years, continuation of this Agreement is subject to appropriation of funds for this Project. If funds to enable the City to effect continued payment under this Agreement are not appropriated or otherwise made available, the City shall have the right to terminate this Agreement without penalty at the end of the last period for which funds have been appropriated or otherwise made available by giving written notice of termination to Contractor. The Contract Administrator shall give Contractor written notice of such non-appropriation within thirty (30) days after it receives notice of such non-appropriation.

D. The provisions of Articles VI and VIII shall survive the expiration or earlier termination of this Agreement for any reason. The expiration or termination of this Agreement, for any reason, shall not release either party from any obligation or liability to the other party, including any payment obligation that has already accrued and Contractor’s obligation to deliver all Deliverables due as of the date of termination of the Agreement.

XII. REMEDIES

A. This Agreement does not, and is not intended to, impair, divest, delegate or contravene any constitutional, statutory and/or other legal right, privilege, power, obligation, duty or immunity of the Parties.

B. All rights and remedies provided in this Agreement are cumulative and not exclusive, and the exercise by either party of any right or remedy does not preclude the exercise of any other rights or remedies that may now or subsequently be available at law, in equity, by statute, in any agreement between the parties or otherwise.

C. Absent a written waiver, no act, failure, or delay by a Party to pursue or enforce any rights or remedies under this Agreement shall constitute a waiver of those rights with regard to any existing or subsequent breach of this Agreement. No waiver of any term, condition, or provision of this Agreement, whether by conduct or otherwise, in one or more instances, shall be deemed or construed as a continuing waiver of any term, condition, or provision of this Agreement.
