APPENDIX A

Documentation of Individual Historic Properties

In Alphabetical Order by Address, Grouped by Category of Significance

September 8, 1994
Address: 214 216 W ANN
Historic Name: David & Sabina McCollum House
Date Built: by 1853
Category of Significance: architecture
Architectural Style: Vernacular
Number of Stories: 2
Building Material: Clapboard
Window Type: Double-hung
Window Panes: two-over-two
Plan Shape: Rectangular
Roof Shape: Side Gable
Roof Material: Asphalt
Dormer Type: None
Porch Type: Half Front
Porch Posts: Square, full height
Porch Railings: flat railing, square spindles
Historic Use: Residential/multi-family
Current Use: Residential/multi-family
Special Features: Very early duplex, saltbox rear wing, I-house form with Greek details

First Map: 1853
First City Directory: 1894
Architect: unknown
Builder: unknown
Notes: Deed research shows lots sold to David A. McCollum by John Allen. Sold by him to John Rose 1872 for $600. David McCollum ran for Reg. of Deeds 1836 - lost to Edw. Clark and David T. McCollum. Extensive information on David T., pioneer 1832, lived on Pontiac Trail in "Sinclair House." D.1880 @ 81.

Photo Date: 11/01/93  Roll: slide  Frame: -0  By: Pieper
214-216 West Ann Street

This house is an example of Ann Arbor's earliest period of development. In form it is an "I" house (ridge parallel to the street, one room deep, two stories tall, and two or more rooms wide) with a "salt box" wing across the back. The low-pitched, side-gabled roof with returns is typical of the Greek Revival style. The duplex form is very unusual for this early period.
INDIVIDUAL HISTORIC PROPERTY DOCUMENTATION FORM 09/12/94

Address: 1127 E ANN

Historic Name: Planada Apartments
Date Built: 1929

Category of Significance: Architecture

Architectural Style: Spanish Eclectic
Number of Stories: 4
Building Material: Brick Veneer
Window Type: Casement, steel
Window Panes: Multi-paned

Statement of Significance

1127 East Ann Street
Planada Apartments

1929

After World War I, student enrollments at the University of Michigan increased dramatically, putting a strain on available rental housing. In addition, with the completion of the new University Hospital in 1925, more housing units were needed nearby for the personnel associated with this huge enterprise. As a result, a type of apartment building more commonly associated with larger urban areas such as Detroit and Chicago was constructed in Ann Arbor.

Like the others in the area, the Planada is in one of the revival styles popular in the 1920s. As the name suggests, the yellow-brick building has a Spanish Revival flavor, from the red clay roof tiles decorating the front roof line with a shaped stone pediment in the center, the wrought iron balconies, twisted stone columns and various pointed window arches, to the small colored tiles in the entry foyer and the charming set of murals on the ceiling depicting various rustic scenes in pastels of pinks and greens. It is almost a pastiche of its period, with every window having a different hood shape, material and form. Like all apartment buildings of this era, it used steel casement windows with many panes of glass. Similarities between this building and buildings in Detroit's Palmer Park suggest it might have been designed by a Detroit architect.

The first occupants were predictably professionals associated with the hospital: teachers, nurses and bacteriologists. Others were students, insurance agents and small business managers. All were taking advantage of the latest in interior design, which usually included Pullman or Murphy kitchens and sometimes Murphy beds.

Many fondly remember this building and make an effort to drive by it on their visits to Ann Arbor. It was one of the many buildings owned by the Lueck family (see 153) which meant it was kept in good repair and rented at a reasonable price.

Statement of Significance

1027 Broadway

Ann Arbor has very few remaining two-story Italianate Commercial buildings. This one is distinguished not only by the original quality of its design, but by how little it has been altered. The upper story is complete with its original full bracketed cornice and round arched windows with their original, triple-arched, four-over-four sash. The lower cornice is partially intact. The cast iron posts beside the center entrance are also original. The original storefront windows have been removed, but the owner has them in storage.

Photo Date: 10/01/86 Roll: slide Frame: -0 By: Pieper
Statement of Significance

1418 Broadway

A classic Greek Revival cottage set well back on a large lot, this small house features gable returns, frieze windows, and a classical entry with sidelights. In its simple form and elegant style, it is typical of houses from the middle of the 19th century as the village grew into a small city. The large lot is also typical of older properties on the southeast side of the Broadway hill.
Address: 1520 BROADWAY

Historic Name: J. C. Taylor House

Date Built: 1862

Category of Significance: architecture

Architectural Style: Italianate

Number of Stories: 2.5

Building Material: Solid Brick

Window Type: Double-hung

Window Panes: six-over-six

Plan Shape: Rectangular

Roof Shape: Hipped

Roof Material: Asphalt

Dormer Type: -0-

Porch Type: Half Front

First City Directory: 1868

Architect: Unknown

Builder: Unknown

Notes: J. C. Taylor Sr. b 1820; emigrated to MI 1831; AA 1840; homeopathic physician; m Harriet McCollum (See 214 E. Ann). J.C. Jr. b 1857 in earlier house on site; successful comic actor; all were fruit farmers. Emily Taylor Allen musician & teacher. (Chapman p 1048; J.C. Jr obituary 8/16/1952)

Photo Date: 06/27/94 Roll: 1 Frame: 7 By: Nakata
Statement of Significance

1520 Broadway

This elegant large Italianate brick house replaced an earlier farmhouse on the property. Original details include the double bracketed cornice and round arched upper windows. The Colonial Revival front porch and enclosed vestibule are a later addition. The Taylor family was well-known in the city and, like many others on Broadway hill, used their large property for fruit farming.
Address: 1660 BROADWAY

Historic Name: Samuel & Ophelia House

Date Built: 1862

Category of Significance: architecture

Architectural Style: Greek Revival

Number of Stories: 2

Building Material: Clapboard

Window Type: Double-hung

Architect: Unknown

Builder: Unknown

Notes: Samuel House was a fruit farmer. (Chapman p. 1007) Next owner, 1871, Charles Manly, Reg. of Deeds, lives in house off and on, added wing in 1890's.

Photo Date: 02/01/94 Roll: slide Frame: -0 By: Pieper
1660 Broadway

After living across the street for some time, Samuel and Ophelia House built this imposing full two-story Greek Revival home on a large lot on the south east side of Broadway near the top of the hill. With its corner pilasters and classical entry complete with transom and sidelights, the house represented their increased prosperity in farming. The next owner, Charles Manly, was active in county government. He used the property primarily as a tenant farm until the 1890’s when he lived there and added the large southwest wing with its Queen Anne windows.
Address: 2961 DEXTER

Historic Name: Frederick Kuehnle House

First City Directory: 1878 WC
First Map: 1856 platt map
Architect: Unknown
Builder: Unknown
Notes: Possibly built by Jacob Steffey Sr., owner of 40 acre lot purchased for $115 in 1832, sold in 1836 for $1,000. Sold again in 1837 for $900 to Frederick Kuehnle. Remained in family till 1927. Son Israel Kuehnle (Chapman 825-6) active in Scio Grange, vintner & wine merchant. Bethlehem Church goers.

Photo Date: 06/27/94 Roll: 3 Frame: 13 By: Nakata
Statement of Significance

2961 Dexter Avenue

This is an extremely old and rare example of a Greek Revival home with a hipped rather than gabled roof. It features a full frieze with windows. The first floor six-over-six sash are original as is the classical entry with sidelights framed by pilasters and a full entablature. One of the few remaining 1830’s houses, it remained in the Kuehnle family for over 90 years.

303 South Division Street
Emanuel Mann House
1853

Emanuel E. Mann came to Ann Arbor in 1830 with his parents, Jonathan and Louise Mann, at the age of 16. He learned the tanner's trade under his father's direction and opened the first steam tannery in Ann Arbor. After the tannery was destroyed by fire, Mann went into business with Christian Eberbach under the firm name of Eberbach and Company, manufacturing pharmaceuticals and medical apparatus. Some years later he purchased a drug store on Main Street. His sons, Albert and Eugene, were proprietors of the Mann Brothers Drug Store well into the 1900s.

A successful and much esteemed man, active in politics, Emanuel was vice president of the organizational meeting of the Republican Party "under the oaks" at Jackson, Michigan, on July 6, 1854. His office at Eberbach and Company was a meeting place for politicians of his day and a rendezvous for prominent early settlers. His sister, Louise, became the wife of Frederick Schmid, the first Lutheran minister in Michigan and the organizer of many German Lutheran churches in the state. Emanuel served on the school board and as an alderman, and for a time represented his district in the state senate.

In 1850 he purchased this lot on the corner of Liberty and Division to build a home for his wife Anna (Niethamer) and their children. Mann sold the house in 1868 when he moved to a nearby farm.

Although its appearance has suffered from use and neglect, the structure is notable for its clean Greek Revival silhouette, the classical doorway with sidelights, and the stucco veneer over its brick surface, scored to resemble large blocks of stone. This aesthetic device, which was practical as it made a dry, snug house, and was characteristic of early local building, once earned Ann Arbor the nickname "little stucco village." Ownership has changed frequently and the house has been adapted for many different residential and commercial uses.

Statement of Significance

530 South Division
John George Koch House

1874

Showcased by its high-profile location next to Hanover Square at the intersection of Division, Packard, and Madison Streets, this brick Italianate “cube” was built in 1874 for John George Koch. Koch was a local furniture maker who had originally apprenticed in Germany. Like many other Germans in Ann Arbor, Koch immigrated from Wurttemberg in 1866. Also like many men of this era, he worked and traveled through many parts of the country including New Haven, Connecticut; Columbus, Ohio; and Dexter, Michigan before finally settling in Ann Arbor in 1872. For seven years he was a stockholder and assistant superintendent of the Keck Furniture Company. In 1880 Koch attempted to go into business on his own but soon teamed up with Jacob Haller in the firm of Koch and Haller, furniture dealers.

Koch sold the house in 1888 to Sarah and William Rice, a wealthy farmer descended from pioneer families of Washtenaw County, who had retired to Ann Arbor that year. A 1906 biography of him states that “he removed to the city of Ann Arbor and there his wife purchased a residence which he made his home until the time of his death, enjoying in well earned ease the fruits of his former toil.” The house remained in the Rice family until about the time of World War I, after which it was rented and its tenants changed every decade.

In the late 1940s, it was purchased by the present owner who has maintained the seven room house in pristine condition, preserving original brackets and the heavy brick arches over the windows. The woodwork in the two downstairs parlors has been refinished after seven layers of paint were removed. Recognizing that these efforts were a contribution to the entire community of Ann Arbor, the Ann Arbor Historic District Commission awarded the owner a Preservation Award in 1988 for keeping this “gem” in top-notch condition.

Photo Date: 03/01/92 Roll: -0- Frame: -0 By: Kip Miller Collection
1111 Fair Oaks Parkway
James Petrie House

Early 1914

In early 1914 developer Charles Spooner planned a subdivision named Scottwood that promised to be: "a group of handsome residences... amid a landscape setting not hitherto attempted... Unlike most additions to the modern city, platted with straight streets and small lots giving scarcely breathing room between the houses, it has winding roads (and) a large garden space... indeed, each house stands on a little knoll, commanding a pleasing view." Such was the setting for the James Petrie home.

All the houses in Scottwood were designed by Dr. Fiske Kimball, at that time an Assistant Professor of Architecture at the University of Michigan and later nationally famous as the head of the Museum of Art in Philadelphia. Since this lot was at the intersection of Norway and Fair Oaks, Kimball chose to place the house facing the corner, rather than either of the streets. The unique floor plan combines circular rooms in the center of each floor flanked by rectangular wings set at an acute angle to the main axis. The round portico in front with its elegant two-story columns exhibits Kimball's fondness for classical detailing. As stated in the brochure for the development, Kimball's designs were to have the "quiet unobtrusiveness of good taste. Each completely individual, they nevertheless harmonize in charm of design and refinement of detail."

The house was built for James N. Petrie, Esq. and his son Warren, and was described in detail by Fiske Kimball in a 1918 issue of Architecture. By 1920, Mrs. Dorothy Sellards and her husband Thomas, both osteopaths, lived here with their two sons. Widowed in 1923, Mrs. Sellards continued to live here, on and off with her sons, until 1940. After World War II, Dr. Norman Maier, Professor of Psychology at the University of Michigan since 1931, moved in with his wife. He lived in the house well into his retirement in the late 1970s.

Statement of Significance

605 North Fifth Avenue

Similar to an "I" house in form in that it is one room deep, two-stories tall, has the gables perpendicular to the street and large chimneys at either end, this house is unusual in having only four bays. There are two windows to the left of the entrance and only one to the right. Its classical details in the cornice returns and entry are typical of the earliest period of Ann Arbor's development. It is one of only a handful of brick houses remaining from this early period.

Notes: Deed research: Foran purchased lot from Caleb Ormsby in 1843 for $110. Sold in 1866 to Spencer Crawford, black family which operated a laundry on State St. Crawfords sold for $600 in 1903 to John Mitchell. In their family until 1975.

Photo Date: 06/27/94  Roll: 5  Frame: 2  By: Nakata
Statement of Significance

713 North Fifth Avenue

Situated on a high bluff above the Huron river valley, this charming 1840s cottage displays a combination of different period design elements. In form it is a modified "I" house — side gabled, one room deep, two-stories tall, but with the entrance in the left of the three bays. It has a Greek Revival raking cornice and frieze board. Especially noteworthy is the Italianate porch with delicate columns and fanciful scrolled brackets. Following the Civil War, the owners were part of the city’s earliest African-American community who settled in this neighborhood. They remained here until the turn of the century.

Statement of Significance

419 South Fifth Avenue

This late Queen Anne house exhibits the growing popularity of Colonial Revival design elements. Typically irregular in form, with fancy shingle and fan patterned siding in the gables and brackets and upper spindles on the front porch, the house also features returns in the front gable and a full pediment and plain round doric posts on the porch. The large, single, transom-style windows in the front wing are typical of both styles.

Builder: Unknown

Architect: Unknown

Notes: Deed research: 1835 lot sold to Paul Minnis for $25, same to George Boughard for $100 in 1836, to David LeSeur for $150 in 1846, and to Uri Bassett for $100 in 1849. He sells to Franklin Wilcox in 1856 for $500. Wilcox to Truesdel for $675 in 1859. Ditz/Dietz buys it in 1860 for $709, there to 1903.

Photo Date: 06/27/94 Roll: 2 Frame: 7 By: Nakata
Statement of Significance

450 South Fifth Avenue

This tiny cottage from Ann Arbor's early settlement period is an example of the Greek Revival style and retains its original six-over-six windows. The one-story wing on the north is a later addition while the Italianate porch is a recent restoration. According to former residents, the original clapboards (now covered by wide aluminum siding) are walnut as are the kitchen walls and cupboards. Long associated with the Dietz family, the house was built by pioneer George Boughard.
Address: 205 N FIRST

Histroic Name: Sarah M Bronson House

Date Built: 1830's

Category of Significance: architecture

Architectural Style: Greek Revival

Number of Stories: 1.5

Building Material: Clapboard

Window Type: Double-hung
Window Panes: one-over-one

Plan Shape: Upright & Wing

Roof Shape: Front Gable with returns

Roof Material: Asphalt

Dormer Type: Wall Dormer

Porch Type: Full Front
Porch Posts: Chamfered
Porch Railings: None

Historic Use: Residential/SF/owner occ
Current Use: Residential/SF/Owner occupied

Special Features: Sidelights, Italianate porch, late example of form, wing is later

First Map: 1853

First City Directory: -0-

Architect: Unknown

Builder: Unknown

Notes: Bronson bought larger lot from John Allen 1825, family there many years but gone by 1860.

Photo Date: 06/27/94 Roll: 5 Frame: 9 By: Nakata
205 North First Street

The one-and-a-half-story front-gabled main wing of this house is Greek Revival in style with raking cornice and returns. A one-story wing was added to the north side in the 1870s and then raised to the same height as the main wing after the turn of the century. The full front porch, which wraps around to the side wing, features Italianate posts and brackets and no railing. Sarah Bronson purchased the land only a year after the founding of the village in 1824 and the property remained in her family for some time. The main wing of the house appears on the 1853 map - the first to show buildings - though parts of that wing may date back to the 1820s.
Address: 442 S FOURTH AVE.

Historic Name: Gottlieb Wild House
Date Built: 1894

Category of Significance: architecture

Architectural Style: Queen Anne

Number of Stories: 2
Building Material: Clapboard
Window Type: Double-hung
Window Panes: one-over-one
Plan Shape: Irregular

First City Directory: 1895
Architect: Unknown
Builder: Unknown

Photo Date: 06/27/94 Roll: 2 Frame: 13 By: Nakata
442 South Fourth Avenue

This well-preserved, elegant Queen Anne house features the irregular plan, wide variety of decorative shingle work in gables and bays, and cut-away corners so typical of this style. The rare two-story front porch is especially elaborate with turned posts and upper and lower spindles. The house remained in the same family from its construction in 1894 until the death of Miss Helen Wild, daughter of the original owner, in 1988. The wrought iron-trimmed wood fence on the front property line is one of the last of its kind remaining in town.
Address: 445 S FOURTH AVE.

Historic Name: George Wahr House
Date Built: 1890

Category of Significance: architecture

Architectural Style: Queen Anne
Number of Stories: 2

Building Material: Clapboard
Window Type: Double-hung
Window Panes: One-over-one

Plan Shape: Irregular
Roof Shape: Stepped Back Gable
Roof Material: Asphalt
Dormer Type: Wall Dormer

Porch Type: Half Front
Porch Posts: Fluted Short Round
Porch Railings: large rail, fat balusters

Historic Use: Residential/SF/owner occ
Current Use: Residential/SF/Owner occupied

Special Features: Decorative shingles and trim in gables, carved barge boards, fretwork above cut-away corners, fan panels below front bay window, carved trim above, rock-faced block piers and wing walls on porch, shingled mansard roof on porch, double door

Statement of Significance

445 South Fourth Avenue
George and Emma Wahr House

1890

Four years before George Wahr constructed a similar high-style Queen Anne house on North Division Street (see 26) next to the Wilson-Wahr House (see 28), he built this house on South Fourth Avenue near the intersection with Packard Street. Embellished with an elaborate display of the woodworker’s craft, the house is detailed with carved barge boards, sunbursts, dormers, bays, and gables, all blending together in a wonderful example of Victorian excess. It is rumored that Wahr had a feud with his neighbor who hung the wash out on a line to dry. This apparently upset him enough to move to the other side of town! (His increasing prosperity might also have prompted the move to a more exclusive part of town.)

Wahr’s bookstore on Main Street became quite successful by the late 1880s when his name appears in bold letters in the City Directory. Four years after he built this house, he opened his second bookstore on State Street. It outlasted his Main Street store by many years, remaining in business until the 1970s. The first occupant after that was Border’s Books, then a used and rare book shop.

Wahr sold the property to the Schaffer family who lived here for close to a century, which helps explain its intact condition today. George D. and Elizabeth Schaffer moved into the house in 1894 and by 1900 they had seven children: Anna, Bertha, Carrie, Elizabeth, Ella, George Jr. and William H. By 1915 only Carrie, Anna, and Bertha were still living with their parents and by the mid-1930s only Anna and Bertha were still here. In 1935, their mother Elizabeth, a widow, married the man next door, Mr. Frank Ohlinger, and moved into 451 South Fourth Avenue. In 1965 she was again widowed. In the late 1970s, probably after her mother’s death, Bertha moved into 451 and rented out 445.

After Bertha’s death, both properties were sold and the house at 445 was purchased by the William Johnson family in 1981. They did a major overhaul of the house, restoring it to its original splendor. They were recognized by the Historic District Commission in 1988 for their splendid efforts at reviving this glorious structure.
Address: 451 S FOURTH AVE.

Historic Name: Ward/Kerr House
Date Built: 1837 & 1887

Category of Significance: architecture

Architectural Style: Queen Anne
Number of Stories: 2
Building Material: Clapboard
Window Type: Double-hung
Window Panes: One-over-one

Plan Shape: Irregular
Roof Shape: Stepped Back Gable
Roof Material: Asphalt
Dormer Type: None

Porch Type: Half Front
Porch Posts: Round, short
Porch Railings: shingle

Historic Use: Residential/SF/Owner occupied
Current Use: Residential/SF/Owner occupied

Special Features: Beveled glass sidelights, diagonal clapboard below square bay windows, real shutters, evolution from 1837 I-house to 1887 Queen Anne

First Map: 1853
First City Directory: 1860
Architect: Unknown
Builder: Unknown
Notes: Deed research: Core I-house by George Ward, bought lot 1837 for $22.50, sold to William Wines 1849 for $400. Traded up until Cornelia Kerr bought in 1887 for $2,000, sold 1897 for $4,000. Present Victorian appearance from this period.

Photo Date: 06/27/94   Roll: 2   Frame: 11   By: Nakata
Statement of Significance

451 South Fourth Avenue

Begun in the late 1830s by George Ward as a typical "I" house, one room deep and two stories tall with the ridge parallel to the street, this house was expanded several times, most notably in 1887 by Cornelia Kerr who added the front-gabled wing with its square bay window giving it its present Queen Anne look. Original windows and shutters remain from this period. The house is one of very few owner occupied residences in this now mostly rental neighborhood.
Address: 2103 GEDDES

Historic Name: Charles & Barbara Conrath Farm
Date Built: 1874
Category of Significance: architecture

Architectural Style: Vernacular Italianate
Number of Stories: 2
Building Material: Clapboard
Window Type: Double-hung
Window Panes: four-over-four
Plan Shape: Upright & Wing

Architect: Unknown
Builder: Unknown
Notes: 1874 Atlas shows house, orchard, small lot labelled "C". 1878 WC Directory lists Charles Conrath, gardener, Sec. 27, 5.25 acres. Barbara listed 1888-99. Andrew F Smith (called "Guinea Pig Smith" - raised them for U-M research). Daughter Kate Smith Inglis - see 2301 Highland.

Photo Date: 06/27/94   Roll: 5   Frame: 13   By: Nakata
2103 Geddes Avenue

An Italianate farmhouse in the upright and wing form, this house retains many of its original four-over-four double hung windows and the classical entry with sidelights and transom. Built for fruit farmers Charles and Barbara Conrath, the property was sold in 1901 to Andrew P. Smith of Detroit who subsequently raised animals for U-M medical experiments, giving rise to his nickname of "Guinea Pig Smith." Smith and his wife, the former Kate Inglis, subdivided the rear portion of the farm and sold a large lot to her brother James Inglis who in 1927 built a large mansion, now known as the U-M's Inglis House at 2301 Highland Road.

627 Gott Street

An unusual and fine example of the Queen Anne style, this northwest side house was probably built either on speculation or as a rental property since the occupants change frequently, sometimes including the owner. Fancy shingles form a band between stories while a large fan detail fills the gable of the front wing. A small gabled upper porch interrupts the steep slope of the set back main entrance porch on the south side. Two-story shallow square bays with large single windows accent both front and south side wings. It was one of the first of a growing number of houses on the northwest side now being restored.

Statement of Significance

1430 Granger Avenue

This large, beautifully maintained, Craftsman style house balances a symmetrical red tile hipped roof with matching dormers above a similarly symmetrical facade with an added double sun porch at the east end. Typical of the style is the use of brick veneer on the first floor with stucco above and exposed rafter ends. One of five sons of a prosperous local merchant, Arthur Arnold, the original owner, ran the family’s jewelry business, a well-known fixture on Main Street for many years.

1808 Hermitage Road
Marvin A. Ives House (The Hermitage)
1914

"I built this house about 1914" wrote Levi D. Wines on an old photograph now housed in the Bentley Library. This 28-room structure, set on a hilltop in 10 acres of large trees, exemplified the estate of a country gentleman. The Georgian style house, with its rigid symmetry, its imposing mass, and its arched windows, corner quoins, stucco walls, and pedimented entry, was built for Marvin Ives, a soap manufacturer from Detroit. Ives was born in Detroit in 1859 but his family had long associations with Ann Arbor. His grandfather, Marvin Allen, had been one of the first members of the University of Michigan Board of Regents. His sister Jennie married Edward Campbell (see 66 and 169). Ives moved into 1808 Hermitage in 1915 with his wife, son and daughter, commuting to Detroit to tend his soap business which he eventually sold to Proctor and Gamble. While the family lived here, from 1917 to 1924, the address was on Ferdon.

The 1923 subdivision of Ives Woods, which created 20 lots, paved the way for houses that now surround the Ives mansion. When Ives sold the house to the Hermitage Fraternity after the death of his wife in 1923, the new street took their name. The Hermitage fraternity remained in the house until 1934. The house was home to several fraternities including Phi Sigma Delta from 1949 until it was sold to University of Michigan Professor Jesse Gordon and his wife Anita in 1970.

The Gordons attempted to restore the house to some semblance of its former grandeur after its rough years as a fraternity house but the task was unending. In 1981 they put the house up for sale. In 1982, a Designer Showcase, similar to that held for the Hoover Mansion (see 172), was held here to raise money for scholarships for the University of Michigan School of Art. The Gordons rented out the apartment on the third floor to Joseph Brodsky, a celebrated Russian dissident poet who later became poet laureate of the United States.

300 West Huron Street

This is one of only two remaining gas stations in Ann Arbor from the 1920s. Such fanciful styles were once common in the city when automobiles were considered a novelty and new service stations were designed to reflect the "modern" age. Here the rough stucco finish and Spanish Mission arches evoke the southwest.

Jacob Beck House
1864

Jacob Beck built this Greek Revival house in 1864 on twenty acres he had purchased from Eber White, a pioneer farmer in Ann Arbor Township. Beck had been a farmer himself for many years in Scio Township, where his family had settled in 1832. This was his retirement home, and he and his wife spent their last years here. “While residing in Ann Arbor he had no business cares, but enjoyed the rest which he had truly earned and richly deserved,” a biographer wrote in 1906.

Interior living space was gained when the roof of the house was raised to permit the addition of the upper story. The bay window on the west is a recent embellishment. Well preserved after more than a century on its hill, the Beck house remains a private residence.

Statement of Significance

947 Wall Street
Nathan Burnham House

1837

In 1834, Anson Brown, his wife Desire, and her brother Edward Fuller began selling land just north of the Huron River. Brown planned to have a new commercial center develop in this area known as “Ann Arbor on the Huron”. He would have made a “killing” selling real estate lots to settlers pouring into the area had he not died in the cholera epidemic of 1834. Brown’s widow soon married Caleb Ormsby and by 1836 the firm, now Ormsby and Fuller, continued selling house lots to settlers at a brisk pace. Nathan Burnham purchased lots 10 and 11 from Fuller and Ormsby in June of 1837 for $600. When he sold the property back to them two years later, he received $1000, indicating that the house had probably been built in the interval. Burnham built the house in an old “New England” style with a high brick foundation, two fireplaces at each end, four rooms on each floor, a central hallway, and an unusual three-part window on the second floor.

The entry is a beautiful example of the carpenter’s craft with its finely carved pilasters and intricately mullioned side lights.

When Dr. Mark Hildebrandt purchased the house in 1969, he removed a more modern door and late 19th century porch and installed this entry which he had salvaged from a house of the same period being demolished. He hired an architect to design the new portico, put in fire stairs and a new entrance off the parking lot in the rear, changing the official address to 940 Maiden Lane. Patients who visited his office enjoyed the unique cobblestone smokehouse with brick quoins that Hildebrandt preserved in its original location in the rear of the house. While renovating the house, he noted that it was constructed with oak beams and pegs, and that the trim was tulip poplar, a wood commonly used in the early settlement period. The house still serves as a doctor’s office, now for Dr. Edward Pierce, a former Mayor of Ann Arbor and well-known political and health activist.

219-223 North Main Street
Pardon Blocks

1894/1899

An Ann Arbor booster publication entitled Ann Arbor Industrial Edition wrote in September of 1900: “Charles F. Pardon, Dealer in meats, provisions and groceries, 221-223 North Main Street. This business was established 7 years ago as a meat market and in 1898. Mr. Pardon bought the grocery stock of J. H. Miller and added it to this business. He afterwards bought the Eberhart Bakery, which he sold to his brother [Frank]. He also conducted a meat market at South Lyons for 6 years which has given him ample experience in his line. His stock embraces both staple and fancy groceries, meats and provisions, which he sells at prices which cannot be undersold in the city.” It appears the family were quite active in the grocery business, for the same publication lists W. E. Pardon as a dealer in groceries and meats at 123 East Liberty.

Charles built his block in three stages, although the casual observer would think it one building. The first and northernmost part, at 223 North Main Street, has a date stone of 1894 in the pediment. The second portion, his brother Frank’s bakery at 219 North Main Street, has a date stone of 1899 in the pediment, while the center portion of the building has a slightly higher pediment and a stone which simply reads, “Pardon Block.” Though this section is rumored to have been finished last, the Sanborn Insurance Map from 1899 labels the central and southern sections “to be bakery” and “to be grocery,” so perhaps they were built simultaneously. By 1916, after Charles Pardon had retired, G. W. Wagner’s Meats was located in the corner store.

Charles Pardon was born in Ann Arbor in 1862 to parents who had emigrated from Germany a few years earlier. A 1906 biographer claimed: “no event of special importance occurred to vary the routine of life for Charles F. Pardon who like most boys of the middle class divided his time between play and work.” Pardon apprenticed to a butcher and, after working in South Lyon for six years, eventually opened a market in his new building. His addition of groceries to his line of meats allowed him to expand to the second storefront in 1899. “As he has prospered in his undertakings he has wisely placed his savings in property and now owns considerable real estate in Ann Arbor — the safest of all investments,” wrote the same biographer.

The Pardon Block (or Blocks) were built of red brick and stone in a Queen Anne commercial style with arcades of round-topped windows on the second floor, square windows on the third floor, and iron cresting on the roof. Remodelings in the past had covered the stone detailing and brick walls with red paint and altered the original shop windows to suit the commercial styles of the 1950s and 60s.

CONTINUED on next page
In 1988, new owners Quinn/Evans Architects, specialists in historic preservation, rehabilitated the southernmost building demonstrating proper preservation on this highly visible street. Evans noted that when the building was painted the contrast between the brick and the stone disappeared. "We removed the paint and the stone popped right out." The Historic District Commission presented a restoration award to Quinn/Evans that year for their fine work.

One year later, Duane Renken of Renken and Co., a real estate and development firm which now makes this building its headquarters began rehabilitating the northern two sections. When the renovation was completed, the company invited Frank Pardon Jr., who was born 86 years earlier above his father’s bakery, to come and have a look. "It looks real nice," he said. The Historic District Commission agreed and awarded Renken a preservation award in 1989.

Bakeries and groceries have operated out of these storefronts for most of the 20th century, but today the two northern sections support a restaurant while the southern section is for rent. With the recent restoration of the Old Post Office across the street, and the new Johnson, Johnson and Roy building around the corner, this edge of town is beginning to enjoy a renaissance. The Pardon Block has been one of the major catalysts for the revival of this area.

Statement of Significance

707 Miller Avenue

This handsome example of the Queen Anne style was recently restored by the present owner, who removed modern siding and repaired the elaborate upper and lower spindle work and brackets on the front porch as well as the unusual two-story side porch. The house represents a period of growth and prosperity in the City when merchants were able to afford larger homes in the latest styles. Brown built the house the same year he began his fine wine, liquor, and cigar shop on North Main Street.

**Notes:** Peach Hill Farm, first commercial peach orchard in area. John a Justice of the Peace. Property still in family 1967. (Huron Valley Advisor 12/17/67). Daughter married Earl Martin active in early Farm Bureau & County Fair.
Statement of Significance

1884 Miller Avenue

Peach Hill Farm must have been quite successful since its owner, John Bird, was able to build an outstanding example of the Italianate style for his home. It features a classical entry with sidelights and transom, typical double windows surrounded by elaborately carved hoods, wide eaves with dentils and paired brackets, and a full front porch with slender composite columns and no railings. Bird’s role as Justice of the Peace is evidence of the esteem in which he was held by his neighbors. The land of this farm was later subdivided to form much of this part of the City.

Notes: Stevens, Professor of Pharmacy, came to AA after 1887. Lived here with wife Amareta until c. 1910. House used as Sigma Nu Frat. 1910, Kappa Beta Psi 1920, Delta Phi 1930. Albert & Rose Zimmer listed in 1940. Large front porch, missing for many years, replaced in 1994.

Photo Date: 06/27/94 Roll: 4 Frame: 23 By: Nakata
Statement of Significance

915 Oakland Avenue

This elaborate brick Queen Anne residence features unusual Gothic Revival lancet windows in its square upper bays. More typical of the style are the paired front doors, round corner tower with turret top, and the large chimney. The recently restored front porch with upper balcony and wide stone front steps complete the eclectic package. The history of the building's occupants is also typical of larger homes in this area. It was built by a U-M Professor, and then converted first for fraternity use, and later to apartments.

Circa 1848

William Wallace Wines and his brother Daniel E. Wines, natives of Connecticut, married two sisters and took them West, to the new frontier of the Michigan Territory. Daniel arrived in Washtenaw County in 1837 followed by William in 1841 and together they operated a lumber mill in Ypsilanti. William moved to Ann Arbor in 1848 and built this charming vernacular cottage, reminiscent of houses common “back East.” Daniel came to Ann Arbor two years later and built himself a house next door at 126 Packard. He then entered the sash, door and blind business, and became a contractor and builder while his brother William co-founded a clothing business known as Wines and Worden.

Biographies of Daniel stress his importance as an early local builder, ranging from comments that he “has erected many of the best business houses and private residences in Ann Arbor” to Fiske Kimball’s comment that “two fine old residences out Washtenaw Avenue, built by Daniel Wines” were “much appreciated by their owners of the faculty” and were “masonry covered with warm stucco.”

This house, which may have been built by Daniel for his brother William, is a simple clapboard structure with a center entry and its long side facing the street — features common in New England. It is probably an I-house, a folk form two stories high and one room deep, though it has quite a large addition on the rear which may be original to the house. The scallop edging is an unusual touch — perhaps new designs made possible by machinery just beginning to make its appearance, perhaps a later embellishment. Old-fashioned construction details include brick nogging found in the walls, a primitive form of insulation (see 116), and wooden pegs for the framing.

The house was purchased by another pioneer, Nelson Strong, in the early 1870s after William built himself a grand brick Italianate house on the corner of Packard and Main Streets. (It was demolished in the 1960s and is now the site of Baker Commons). Shortly thereafter, Strong sold it to his son-in-law Sedgewick Dean. Dean ran a grocery store on Main Street, but the family’s name has been perpetuated by his daughter Elizabeth, who willed the City of Ann Arbor over a million dollars in 1964 for the special care of the city’s trees. The Elizabeth Dean Fund perpetuates the memory of this fine lady who astonished the town with her generous bequest.

Elizabeth Dean had left this house long before she died, but her earliest years were spent here. A scene from her daily life is revealed in the diary of visiting nurse Emily Hollister, who wrote in July of 1890: “I come to Mr. Sedwick (sic)
William W. Wines House (Dean House) CONTINUED

Dean's place to nurse Mrs. Stebbins' (Elizabeth's aunt) daughter Emily who is sick with typhoid fever. She is a lovely girl — The family is very pleasant. Clara Dean is 14 years old — very interesting. Miss Elizabeth is 5 years old. Her mother has been dead for 5 years and Mrs. Stebbins has been with the family. Mrs. Stebbins is a daughter of Dr. Strong.”

Elizabeth eventually sold the house after World War I to Reverend E. C. Stellhorn, a Lutheran minister. Stellhorn altered the interior considerably and probably changed the window to the right of the doorway so he and his wife could enjoy a more modern lifestyle. They occupied this house for almost half a century. After their deaths, the house was purchased by Donald Van Curler, a local architect and developer. He had originally intended to demolish the house and build an apartment building, but was so enchanted when he toured the interior and noted the high ceilings, chandeliers, and marble washstands, that he changed his mind and moved in instead!

Statement of Significance

126 Packard Street

This large Victorian Eclectic double house was built by pioneer builder Daniel Wines for his own family. It features a complicated floor plan (the result of various additions though the years) and unusual stick style window trim around the double windows. Daniel’s son, Levi, also a well-known local builder and later Superintendent of Schools, lived in the other half of the house. Later owner Dr. Samuel Jones was Dean of the Homeopathic Medical Department and noted for his hospitality.

Statement of Significance

1029 Pontiac Street

This stately Greek Revival house is the larger portion of an upright and wing house that originally stood further south on the lot overlooking the river valley. (See historic photograph, page 2 of the Report.) The front entrance is distinguished by sidelights and transom crowned by a peaked molding. The present owner believes it to have been built by pioneer Anson Brown the founder of "Lower Town". With his partner and brother-in-law, Edward Fuller, Brown built the first dam across the Huron River and the second mill in the village. They then platted Wall Street, Maiden Lane, and Broadway where Brown built a large brick commercial block on the corner of what is now Swift Street. After his untimely death from cholera in 1834, his widow Desire married Dr. Caleb Ormsby and they continued to live in the house. County histories give an account of watching the arrival of the first train on the Michigan Central Railroad from the Ormsby’s house on the hill above the river in 1840.

Statement of Significance

1317 Pontiac Street

An intact and typical example of the early Greek Revival farmhouse, this house has a ridge line parallel to the street, side gables with returns, and its original six-over-six double-hung windows. The facade has three bays with a simple entrance in the center. The original owner’s business connections with the abolitionist Beckley family, as well as the north side location on the main road out of town, have led to speculation that it was a station on the Underground Railway. Like many property owners in the area, William Perry seems to have been a gentleman farmer with a business in town. An old barn remains on the property.

Statement of Significance

1416 Pontiac Street

This simple but elegant example of the Vernacular Italianate style features a classical entrance with sidelights and transom, and four-over-four double-hung windows. Those on the lower floor have simple peaked hoods, while the tops of the second floor windows abut the wide frieze board. The asymmetrical facade has an extra bay on the right side. The house was moved to the north side from downtown to save it from demolition in 1947. In the 1870s, lumber yard owner Christian Schmid added this larger, more fashionable wing to the front of an 1836 small Greek Revival house already on his lot on South First Street. This older part was moved to the corner of Pontiac and Kellogg.

Statement of Significance

625 Spring Street

This is an unusual blend of style elements. The shallow roof pitch, gable returns and frieze moldings, and the triangular attic window are characteristic of the Greek Revival, while the heavy brick segmented arches above the windows are typical of the Italianate style. The full front porch is much later and in the Colonial Revival style. This is one of the original farmhouses in the area and reflects the post-Civil War prosperity of Ann Arbor at the time.

331-339 Thompson Street
St. Mary’s Student Chapel
1924-25

The building was designed in 1924 by Albert J. Rousseau, professor of architecture at the University of Michigan from 1917 to 1931. Rousseau was trained in his native city of Quebec and at the Ecole Nationale et Speciale des Beaux Arts in Paris. Basically an innovator, Rousseau made no attempt to camouflage with fake buttresses and arches the modern construction methods used in the chapel. The half-story basement contains rooms for social and recreational use, while the main floor houses a plain auditorium. The present fittings of the chapel are not original. The exterior has a strong Art Deco flavor, note particularly the large stone crosses and windows. Rousseau was also the architect of the facade of the Land Title Building at 106 North Fourth Avenue (see 52), as well as one of the architects of Ann Arbor’s Art Deco Masonic Temple, demolished in 1975, which had similar brick work and decoration.

The Student Chapel was established for students and faculty in 1919 under the direction of the Reverend Michael Bourke, who was also chaplain of St. Joseph’s Mercy Hospital. The first chapel, which was independent of the St. Thomas parish, was in a home on South State Street where the University of Michigan Administration Building now stands. When Father Bourke sold the old chapel to the University and bought the property at 331 Thompson, he had the building designed and the contract let. The day before construction was to begin, Father Bourke learned of a diocesan plan to block the plans. He hurriedly got out contractor Pipp at 11 o’clock at night, had him move a big shovel to the lot and dig out a shovel full of dirt. The next day, Father Bourke attended the diocesan meeting and informed the members that construction had begun. In 1928 St. Thomas and the Student Chapel were consolidated under Father Carey. In 1940 St. Mary’s again became a separate parish for Catholic students attending the University.

When the student population dramatically increased after World War I, there was a boom in the construction of apartment buildings. In 1923 the Anberay was the first to be completed.

Built in a style referred to as “Chicago,” perhaps because its U-shape is similar to many apartment buildings built in Chicago during this period, it is a simple, straightforward building of yellow brick with stone trim decoration. Its U-shape plan forms a central courtyard, with two gateways that flank a wall with the name “Anberay” carved in stone. Each of the 21 units has its own balcony with stone and brick balustrades, each with a slightly different design. The number of vertical units in the balustrade decrease in number as one moves from the top floor down to the ground. This rhythmical design is further accented by the stepped-in pattern of each of the two sides of the “U” giving the whole a feeling of movement and energy.

The earliest tenants of the Anberay were definitely from the better set in Ann Arbor. They included the Athletic Director of the University of Michigan, Elizabeth Dean (see 127) and Dr. A. C. Furstenberg, as well as University of Michigan Professors Palmer Christian, DeWitt Parker, Ermine Case, and Frances Kelsey. Many tenants spent their entire lives here, even after retirement. Often they came as new faculty and never left the comfortable, spacious, modern units.

After the collapse of the stock market in 1929, many builders could not meet their mortgage payments. For the price of back taxes, buildings were bought very cheaply, often by well-known landlords Rosa and Harold Lueck. Rosa started their apartment building empire in the early 1930s with the purchase of this building. She had come from Germany almost penniless and worked as a washerwoman, scrimping and saving until she had enough to buy buildings such as this. Harold did the plumbing and general handy work, even years later when they were millionaires. The building is still owned by their son who lives in Seattle and maintains an interest in the properties.

936 Wall Street

This Greek Revival house is a half-story shorter than most upright-and-wing houses. Though the first floor windows and the elegant entry with its sidelights form a perfect three-bay facade, the upper windows are not at all symmetrical. This is the last remaining house on the south side of Wall Street, one of the oldest streets on the north side and one which once was lined with houses from the 1830s and 1840s. Many people involved in river-oriented businesses lived in the area and Sumner Hicks, a miller, was no exception. Many millers as well as tanners and foundry workers lived nearby along Wall Street and lower Broadway.

315-323 East Washington Street
Michigan Bell Telephone Company

1925

The design of this building is attributed to William Kapp of Smith, Hinchman and Grylls, a Detroit firm of architects which has designed several buildings for Michigan Bell. A graduate of the University of Pennsylvania, trained in the Beaux Arts tradition, Kapp incorporated in his design many of the characteristics of that style. Notable is the use of terra cotta tiles instead of carved stone (a relatively new technique at the time), outstanding capitals and arches, and bricks curved at the windows. The molds for the terra cotta tiles were designed by Mr. Kapp.

William Kapp's other buildings include the University Club and Players Club in Detroit, the Country Club in Grosse Pointe, Meadowbrook Hall, and the Rackham School on the University of Michigan campus.

411-413 East Washington Street
Albert Polhemus House

1848

This well-built Greek Revival house has a characteristic classic entry with sidelights. The elegantly restrained porches are later additions. The house was built in 1848 for Albert and Leah Polhemus and their family of six, who had come to Ann Arbor from the state of New York.

The Reverend Malthy Gelston, Jr. family moved into the house in 1861. Mr. Gelston and his brother, Mills B. Gelston, were "supply" ministers for small churches in lower Michigan. Malthy's son, Joseph Mills Gelston, was pastor of the First Presbyterian Church of Ann Arbor from 1888 to 1909. After Malthy Gelston's death in 1893, his daughter Sarah converted the house into apartments, which at the time were reserved for single or widowed ladies. It has now been converted into offices.

**Statement of Significance**

606 East Washington Street

This fine example of the Italianate style originally stood facing State Street on the south end of the lot now occupied by Lane Hall. The house still has dentil trim under the eaves, paired brackets, and the original four-over-four double-hung windows with rare arched upper panes. The paired window frames on the facade have crossettes (sometimes called "ears") with peaked hoods over the lower windows. The upper windows abut the wide frieze board. The original front door has arched, painted glass panels. When Lane Hall was built in 1917, the house was moved around the corner and reoriented so that its entrance now faces Lane Hall's parking lot instead of the street.
Address: 1402 WASHINGTON HTS.

Historic Name: Observatory Lodge

Date Built: 1930

Category of Significance: architecture

Architectural Style: Tudor Revival

Number of Stories: 4.5

Building Material: Solid Brick

Window Type: Casement, wood

Window Panes: Transom

Plan Shape: U-shaped

Roof Shape: Multi-gabled

Roof Material: Slate

Dormer Type: Gabled

Porch Type: None

Porch Posts: N/A

Porch Railings: N/A

Historic Use: Residential/multi-family

Current Use: Residential/multi-family

Special Features: Stone full height round turret with squirrel weathervane, oriel windows, half timbering, carved wood lintels and shutters, short gabled buttresses, variety of materials shapes and details, sign

First Map: 1931 SB

First City Directory: 1930

Architect: Unknown

Builder: Unknown

Notes: Second largest of several apartment houses built in late 20's. Otto Haisley, Super. of Schools, one of first tenants, plus faculty, doctors, nurses, etc.
Statement of Significance

1402 Washington Heights

At over four stories, this large and complex apartment house is not only an excellent example of the Tudor Revival style, it also the tallest of the apartment houses built at the end of the roaring twenties. Its irregular floor plan, many-gabled slate roofs, half-timbered accents, and casement windows with occasional orielis are all elements typical of the style at its best. The city's professional and educational elite were attracted to the variety of unusual floor plans, large rooms, and rare amenities such as fire places. The famous squirrel weathervane has been a landmark to generations passing by either to the dormitories or the old hospital nearby.
Address: 1443 WASHTENAW

Historic Name: Phi Kappa Sigma Fraternity

Date Built: 1924

Category of Significance: ARCHITECTURE

Architectural Style: Prairie

Number of Stories: 2

Building Material: Brick Veneer

Window Type: Double-hung

Window Panes: One-over-one

Plan Shape: Rectangular

Roof Shape: Hipped

Phi Kappa Sigma Fraternity (Trotter House)

1924

"The Phi Kappa Sigma house was lavishly built at a cost of $125,000 in 1924," wrote noted writer and University of Michigan alumnus Edmund G. Love in a 1988 article in the Ann Arbor Observer on what he called his "depression education." Love also wrote: "By 1932, its members were so financially pressured that I was given a job in the house only after I recruited half a dozen new members." Love was the son of a Flint lumberman whose finances during the Depression forced his son to drop out of college and work at menial jobs. Love was determined to finish college, however, and in 1932 he returned to Ann Arbor and to his former fraternity. "No matter how broke I was, however, I spent the fall in a very posh atmosphere. The Phi Kappa Sigma house... sat on a huge plot of land... on Michigan's fraternity row, and had sweeping lawns, front and rear, with a stand of great trees surrounding it."

This fraternity house, purportedly designed by noted local architect Albert J. Rousseau, is in a style reminiscent of Frank Lloyd Wright and the Chicago School with its wide sweeping porch and low sloping roof. Rousseau also designed a number of other buildings in Ann Arbor including St. Mary's Student Chapel (see 151), the facade for Lawyers Title (see 52), his own home at 2001 Vinewood. The fraternity was and is extremely elegant in its simplicity of design and materials. The site today could still be described in Love's words of 1932. In the 1970s following the Black Action Movement on campus, the University of Michigan purchased the house for a center where African-American student groups could hold meetings and cultural events. The house was renamed Trotter House after journalist and African-American activist William Monroe Trotter. Born in 1872, Trotter graduated magna cum laude from Harvard University after growing up in the white suburbs of Boston, and was the first African-American to receive a Phi Beta Kappa key at Harvard. After earning a master's degree at Harvard, Trotter dedicated his life to battling oppression and to educating other African-Americans on important issues of the day.

1850 Washtenaw Avenue
Edward L. Adams House

1917

This noble Georgian Revival house was built in 1917 for Edward Larrabee Adams, Professor of French in the Romance Languages Department at the University of Michigan. Adams, whose specialty was Old Provençal, joined the faculty in 1904 as an instructor and retired as Professor in 1949. In 1917 Adams hired local architect Samuel McCoskry Stanton to design his house. Stanton created this side-gabled, center-entry brick structure to resemble early 18th century American houses. The balanced design, end chimneys, central roof dormer flanked by eyebrow dormers, and the porticoed entry with Chinese Chippendale railing are all features of this style.

Stanton, the grandson of the first Episcopal bishop of Michigan, was born in Detroit and educated as an architect in Paris and Stuttgart. He came to Ann Arbor around 1900 and had a fairly well-established practice by the time he designed this home. His other well-known local buildings include the University of Michigan Homeopathic Hospital (now known as North Hall), the Hobbs house at the corner of Hill and Oxford Road, and his own family home at 501 Onondaga. He also supervised the construction of the Equitable Building in New York City. He practiced in Ann Arbor for over 40 years and died in 1946.

Professor Adams lived on in the house after his retirement until his death in 1958. A few years later it became the home of his son, Edward L. Adams, Jr., a consulting psychologist, who lived here with his wife until 1986. He and his brother Dwight perpetuate their father's name through an endowment to the Romance Languages and Literatures Department which is used to support the department's alumni newsletter. Due to this long continuity of ownership, the house has remained in almost pristine condition.

Dean Myers House
(First Unitarian Universalist Church)

1917/1956

Probably the only Swiss Chalet-style house in Ann Arbor, this cut fieldstone house was built by local contractors Weinberg and Kurtz for Dr. Dean Myers, a prominent eye, ear, nose and throat specialist. The builders were so proud of it that they featured it on their checks for years.

Myers was a 43-year-old widower when he moved in and shared the house with his daughter Dorothy and his mother-in-law. In addition to his private practice, he was active in community affairs and served on the Ann Arbor City Council, the school board, and as chair of the Democratic party. After six years in the house, he married Eleanor Sheldon, who had been the first house director at Betsy Barbour dormitory. In 1946 Dr. and Mrs. Myers sold the house and moved out to Hildene Manor (see 174). He died in 1953, and she followed a few years later.

The purchaser of their house was not another couple, but a church. The Unitarian Church had occupied a large building at State and Huron since 1883 (see 137) but seriously declining membership and maintenance problems led them to sell the church and purchase this home in 1946. Ironically, a new pastor spurred church growth to a point where not only did they need to build a parsonage on the rear of the Myers' house in 1948 (expanded in 1955), but a wing for holding services as well.

George Brigham, a well-known local architect of modernist sensibilities, member of the architecture faculty at the University of Michigan, as well as of the church congregation, designed the new sanctuary in 1956. Brigham's design was successful, as each building complements the other and yet stands as a product of its own time. Apparently, even Frank Lloyd Wright was pleased with the results for he declared, "That's good!" in one of his rare expressions of approval.

This Tudor Revival style building is actually eight six-room apartments, cooperatively owned. When it was built it was the only cooperatively owned apartment house in Ann Arbor. The large roomy apartments reflect the 1920s when apartment living was chic and largely confined to the wealthy. The builders of this venture, the Group Homes Apartments, chose the Tudor Revival or “Olde English” style as a way of expressing their taste, their refinement, and perhaps their lineage. Half-timbered with stucco on the exterior, it has symmetrical stone arched entries, a steeply pitched roof punctuated by chimneys, and groups of double hung windows with small panes of glass.

The owners of each unit are free to decorate them individually while the group as a whole maintains the grounds and the exterior. Though many such cooperative ventures fail, this one succeeded, “because of the spirit of the people living there.”

The apartments adopted the name Hildene Manor in 1927, a year after the building was completed. A newspaper article from that year stated that it acquired a name because it was located outside the city limits, and no number could be given to it for mail delivery, “so the residents decided to name it to avoid confusion.” Perhaps they also liked the idea of referring to themselves as living in a “manor.”

Recognizing that Hildene Manor has never fallen into disrepair and has always been maintained in the high standards with which it was built, the Ann Arbor Historic District Commission gave it a Preservation Award in 1990. Though it has long been part of the city of Ann Arbor, its setting on Washtenaw beneath massive trees still gives the sense of a country estate today.
