

NORTH SEVENTH STREET - HURON ST. TO MILLER AVE.

DRAFT CONCEPT #4

- Bi-directional Bike Lanes (Cycle Track) on East Side
- Remove All Parking

Draft concepts are subject to change pending additional engineering analysis, public input, stakeholder feedback (including MDOT) and other considerations. The implementation timeframe for the selected improvement will depend on its complexity, cost, and required approvals.

Concept 4 - Considerations:

- Technical feasibility has not yet been determined;
- MDOT approval may be required for changes to vehicle turn lanes and/or signal phasing;
- This option may not be feasible if vehicle turn lanes cannot be removed at Huron and Miller and/or bicycle signal cannot be added;
- Long-term implementation timeframe.
