## **R. ENVIRONMENTAL COMMITMENT**

The City of Ann Arbor recognizes its responsibility to minimize negative impacts on human health and the environment while supporting a vibrant community and economy. The City further recognizes that the products and services the City buys have inherent environmental and economic impacts and that the City should make procurement decisions that embody, promote and encourage the City's commitment to the environment.

The City strongly encourages potential vendors to bring forward tested, emerging, innovative, and environmentally preferable products and services that are best suited to the City's environmental principles. This includes products and services such as those with lower greenhouse gas emissions, high recycled content, without toxic substances, those with high reusability or recyclability, those that reduce the consumption of virgin materials, and those with low energy intensity.

As part of its environmental commitment, the City reserves the right to award a contract to the most responsive and responsible bidder, which includes bids that bring forward products or services that help advance the City's environmental commitment. In addition, the City reserves the right to request that all vendors report their annual greenhouse gas emissions, energy consumption, miles traveled, or other relevant criteria in order to help the City more fully understand the environmental impact of its procurement decisions.

## **SECTION II - SCOPE OF SERVICES**

The City is currently accepting proposals to perform soil borings and pavement cores at various locations and depths throughout the City. The work for this contract will be on an “as needed” basis. The selected firm(s) will be awarded a contract for a fixed amount, and the City will request work as is required.

Many of the borings requested through this contract will likely consist of 5-foot deep borings for road resurfacing/reconstruction projects. In addition, there will likely also be deeper borings for utility replacement and stormwater infiltration projects. Most of the borings will be located within, or adjacent to, public streets.

The City may also request that environmental drilling or direct push drilling be performed at sites of known or suspected contamination.

It is the City’s intent to bundle work together as much as possible to reduce mobilization and overhead costs, however some requests for work may still need to be performed separately as needed. For purposes of this contract, a “bundle” will be defined as each request for work from the City. The City may request a cost estimate on each bundle of work prior to beginning the work. Such estimates shall be performed at no cost to the City.

The work to be performed by the selected firm(s) shall include:

- Performing soil borings in locations as directed by the City. Each soil boring shall include pavement cores for the purpose of determining existing pavement thickness. This shall also include coring through any concrete pavement or base that may be encountered. Soil borings will extend to the depth indicated, as measured from the top of the existing pavement.
- Careful measurement and recording on the boring logs of all pavement and aggregate base thicknesses. The composition and description of the aggregate base shall also be reported on the boring logs (i.e. natural aggregate or crushed limestone). Sufficient samples of aggregate base and sand subbase materials shall be obtained to perform sieve analysis testing if requested by the City.
- Continuous sampling on all soil borings for the first 2½ feet below the existing pavement surface.
- Measuring and recording the distance of the actual boring location from the nearest curb line and from another permanent feature (such as a drainage structure, driveway opening, etc.). Sampling locations will be marked in the field by a representative of the firm as directed by the City. Any boring locations needing to be offset due to conflicts with existing utilities, parked cars, trees, or other unmovable obstacles shall be coordinated with the City.

- Preparing boring logs describing in detail the soil types encountered and results of laboratory analysis, as well as the locations of the soil borings and cores.
- Preparing a geotechnical report describing the results of the soils investigation and making recommendations as appropriate. The geotechnical report will also provide a summary table of the soil boring results, which shall include, at a minimum, the street name and limits, range of asphalt thicknesses encountered, thickness and description of base course encountered, a brief description of subgrade soils, estimated Resilient Modulus measured in psi, analysis of any laboratory results, and photographs of the labeled pavement cores with a reference scale such as a ruler, tape measure, etc. One report shall be prepared per “bundle” of projects, as requested by the City.
- Any laboratory testing required to provide comprehensive soil boring logs and/or geotechnical reports. This shall include, at a minimum, visual engineering classification of all samples (in accordance with the USCS) as well as moisture content and soil strength tests on cohesive samples. All core thicknesses shall be measured in the laboratory to verify measurements obtained in the field. Laboratory testing shall be included in the cost of the soil borings.
- Additional laboratory testing as requested by the City, such as gradation analysis or permeability.
- Obtaining the proper permits from the City of Ann Arbor and supplying the necessary traffic control during drilling operations. The selected firm will need to obtain Right Of Way Permits and Lane Closure Permits (when necessary) from the City of Ann Arbor. The fees for these permits shall be waived. Or if borings are located in MDOT jurisdiction, obtaining MDOT permit. If necessary, the Consultant shall rent parking meter bags (at the Consultant’s cost) to assure access to soil borings in areas where parking meters are present.
- Performing environmental soil borings or direct push drilling at sites of known or suspected contamination. Environmental drilling, which requires the drill rig, augers and other equipment to be decontaminated prior to drilling operations, shall be done in accordance with EPA standards.
- Performing environmental direct push drilling (i.e. Geoprobe), which uses a percussion hammer to push and vibrate into the ground, instead of rotating. The soil samples shall be collected in 5' plastic liners, so that volatile organics are not exposed to the atmosphere, resulting in better analysis.
- Preparing a site specific environmental work plan and Health and Safety plan for the City’s review and approval prior to performing environmental soil borings or direct push drilling at sites of known or suspected contamination.
- Collecting of soil and groundwater samples suitable for submittal for analytical evaluation for PNAs, VOCs, metals or other analysis requested by the City. These

samples, including trip blanks, shall be collected and delivered to City staff or a suitable laboratory using the standard chain of custody protocols.

- Implementation of traffic control for all major streets in conformance with the most current edition of the Michigan Manual of Uniform Traffic Control Devices (MMUTCD).
- All services shall be performed in compliance with all applicable EPA, ASTM, MDOT, and City Standards and Specifications, and shall be performed under the direction of a Michigan licensed professional engineer, employed by the selected firm.

The City does not guarantee either a minimum volume of work or a specific volume of work if a contract is awarded.

## **PROPOSAL EVALUATION**

1. The selection committee will evaluate each proposal by the above-described criteria and point system (A and B) to select a short-list of firms for further consideration. The City reserves the right to reject any proposal that it determines to be unresponsive and deficient in any of the information requested for evaluation. A proposal with all the requested information does not guarantee the proposing firm to be a candidate for an interview. The committee may contact references to verify material submitted by the offerors.
2. The committee then will schedule interviews with the selected firms if necessary. The selected firms will be given the opportunity to discuss in more detail their qualifications, past experience, proposed work plan and fee proposal.
3. The interview must include the project team members expected to complete a majority of work on the project, but no more than six members total. The interview shall consist of a presentation of up to thirty minutes (or the length provided by the committee) by the offeror, including the person who will be the project manager on this contract, followed by approximately thirty minutes of questions and answers. Audiovisual aids may be used during the oral interviews. The committee may record the oral interviews.
4. The firms interviewed will then be re-evaluated by the above criteria (A through D), and adjustments to scoring will be made as appropriate. After evaluation of the proposals, further negotiation with the selected firm may be pursued leading to the award of a contract by City Council, if suitable proposals are received.

The City reserves the right to waive the interview process and evaluate the offerors based on their proposals and fee schedules alone and open fee schedules before or prior to interviews.

The City will determine whether the final scope of the project to be negotiated will be entirely as described in this RFP, a portion of the scope, or a revised scope.

Work to be done under this contract is generally described through the detailed specifications and must be completed fully in accordance with the contract documents.

Any proposal that does not conform fully to these instructions may be rejected.

## **PREPARATION OF PROPOSALS**
