SECTION I - GENERAL INFORMATION

A. OBJECTIVE

The City of Ann Arbor has the ambitious goal of achieving community-wide carbon neutrality by the year 2030. A key element of that work involves electrifying transportation and supporting growth of electric vehicle (EV) use and ownership throughout the community. To ensure the benefits of EV ownership are experienced across the entire community, the City is building a convenient, reliable, and affordable public EV charging network. There are currently over 50 City-owned public EV chargers within this network, which includes Level 2 and Direct Current Fast Chargers (DCFC) manufactured by FLO and ChargePoint. The City wants to remain as consistent as possible with EVCS hardware, software, and mobile applications for activation as it grows its network.

Specifically, the City has identified 30-45 potential site hosts, including parks, libraries, schools, multifamily apartments, private retail lots, and right-of-way, curbside locations. Over the next 18-24 months, the City intends to install a minimum of 48 Level 2 and Direct Current Fast Chargers (DCFC) at some of these potential sites, with four network-connected charging ports at each location.

In preparation for the expansion of electric vehicle charging stations (EVCS), the City is looking to contract with an experienced EVCS design team to successfully execute technical and design work to make EV charging fully operational at select sites. The specific contractor(s) will be asked to work with City staff and potential site hosts to fully evaluate site feasibility, electrical capacity, cost variables, and other technical requirements across the pool of candidate sites. The project team will continually eliminate and refine sites based on viability, in order to reach a final group of 10-20 sites. Once the final sites have been determined, the selected contractor will prepare complete EVCS engineering design for either four Level 2 charging ports, four DCFC ports, or a combination of both at each of the final sites. This will include final drawings, permitting, and other technical documents needed for construction. The successful bidder(s) will also provide EVCS construction management support to the City. Importantly, bidders selected under this RFP will NOT be constructed the EVCS', but will be responsible for pre-construction, final design, and construction management.

The City intends to award this design scope to a single qualified firm. Multiple awards may be made if no single proposer can meet the full scope in the required timeframe. The City intends to issue a separate solicitation for construction services; award of this RFP does not assume preference or obligation for future construction phases.

B. QUESTIONS AND CLARIFICATIONS / DESIGNATED CITY CONTACTS

All questions regarding this Request for Proposal (RFP) shall be submitted via e-mail. Questions will be accepted and answered in accordance with the terms and conditions of this RFP.

All questions shall be submitted on or before March 6, 2026 by 10:00 a.m., and should be addressed as follows:

Scope of Work/Proposal Content questions shall be e-mailed to Stephen Janoyan, Electric Vehicle Coordinator - SJanoyan@a2gov.org

RFP Process and Compliance questions shall be e-mailed to Colin Spencer, Buyer - CSpencer@a2gov.org

Should any prospective offeror be in doubt as to the true meaning of any portion of this RFP, or should the prospective offeror find any ambiguity, inconsistency, or omission therein, the prospective offeror shall make a written request for an official interpretation or correction by the due date for questions above.

All interpretations, corrections, or additions to this RFP will be made only as an official addendum that will be posted to a2gov.org and MITN.info and it shall be the prospective offeror's responsibility to ensure they have received all addenda before submitting a proposal. Any addendum issued by the City shall become part of the RFP, and must be incorporated in the proposal where applicable.

C. PRE-PROPOSAL MEETING

A pre-proposal meeting will be held:

WHEN: March 3, 2026 at 2:00 p.m.

WHERE: City Hall Building, 1st Floor South Conference Room, 301 East Huron Street, Ann Arbor, Michigan 48104

The meeting is not mandatory; however, it is highly recommended that interested offerors attend the meeting. The purpose of this meeting is to discuss the project with prospective offerors and to answer any questions concerning RFP 26-15. Any questions and answers furnished in the pre-proposal meeting will not be official until verified in writing through an addendum.

D. PROPOSAL FORMAT

To be considered, each firm must submit a response to this RFP using the format provided in Section III. No other distribution of proposals is to be made by the prospective offeror. An official authorized to bind the offeror to its provisions must sign the proposal. Each proposal must remain valid for at least ninety days from the due date of this RFP.

Proposals should be prepared simply and economically providing a straightforward, concise description of the offeror's ability to meet the requirements of the RFP. No erasures are permitted. Mistakes may be crossed out and corrected and must be initialed in ink by the person signing the proposal.

E. SELECTION CRITERIA

Responses to this RFP will be evaluated using a point system as shown in Section III. A selection committee comprised of staff from the City will complete the evaluation.

The fee proposals will not be reviewed at the initial evaluation. After initial evaluation, the City will determine top proposals, and open only those fee proposals. The City will then determine which, if any, firms will be interviewed. During the interviews, the selected firms will be given the opportunity to discuss their proposal, qualifications, past experience, and their fee proposal in more detail. The City further reserves the right to interview the key personnel assigned by the selected offeror to this project. If the City chooses to interview any respondents, the interviews will be tentatively held the **week of March 30, 2026**. Offeror must be available on these dates.

All proposals submitted may be subject to clarifications and further negotiation. All agreements resulting from negotiations that differ from what is represented within the RFP or in the proposal response shall be documented and included as part of the final contract.

F. SEALED PROPOSAL SUBMISSION

All proposals are due and must be delivered to the City on or before, March 19, 2026 at 11:00 a.m. (local time). Proposals submitted late or via oral, telephonic, telegraphic, electronic mail or facsimile **will not** be considered or accepted.

Each respondent must submit in a sealed envelope

- **one (1) original proposal**
- **one (1) digital copy of the proposal preferably on a USB/flash drive as one file in PDF format**

Each respondent should submit in a single separate sealed envelope marked Fee Proposal

- **two (2) copies of the fee proposal**

The fee proposal and all costs should be separate from the rest of the proposal.

Proposals submitted should be clearly marked: **“RFP# 26-15 – EV Charging Station Design and Construction Management Support Services”** and list the offeror's name and address.

Proposals must be addressed and delivered to:

The City will not be liable to any prospective offeror for any unforeseen circumstances, delivery, or postal delays. Postmarking on the due date will not substitute for receipt of the proposal. Offerors are responsible for submission of their proposal. Additional time will not be granted to a single prospective offeror. However, additional time may be granted to all prospective offerors at the discretion of the City.

A proposal may be disqualified if the following required forms are not included with the proposal:

- **Attachment C - City of Ann Arbor Non-Discrimination Declaration of Compliance**
- **Attachment D - City of Ann Arbor Living Wage Declaration of Compliance**
- **Attachment E - Vendor Conflict of Interest Disclosure Form of the RFP Document**

Proposals that fail to provide these forms listed above upon proposal opening may be deemed non-responsive and may not be considered for award.

Please provide the forms outlined above (Attachments C, D and E) within your narrative proposal, not within the separately sealed Fee Proposal envelope.

All proposed fees, cost or compensation for the services requested herein should be provided in the separately sealed Fee Proposal envelope only.

G. DISCLOSURES

The successful offeror must comply with all applicable requirements and provide documentary proof of compliance when requested.

K. CONFLICT OF INTEREST DISCLOSURE

The City of Ann Arbor Purchasing Policy requires that the consultant complete a Conflict of Interest Disclosure form. A contract may not be awarded to the selected offeror unless and until the Procurement Unit and the City Administrator have reviewed the Disclosure form and determined that no conflict exists under applicable federal, state, or local law or administrative regulation. Not every relationship or situation disclosed on the Disclosure Form may be a disqualifying conflict. Depending on applicable law and regulations, some contracts may be awarded on the recommendation of the City Administrator after full disclosure, where such action is allowed by law, if demonstrated competitive pricing exists and/or it is determined the award is in the best interest of the City. A copy of the Conflict of Interest Disclosure Form is attached.

L. COST LIABILITY

The City of Ann Arbor assumes no responsibility or liability for costs incurred by the offeror prior to the execution of a Professional Services Agreement. The liability of the City is limited to the terms and conditions outlined in the Agreement. By submitting a proposal, offeror agrees to bear all costs incurred or related to the preparation, submission, and selection process for the proposal.

M. DEBARMENT

Submission of a proposal in response to this RFP is certification that the Respondent is not currently debarred, suspended, proposed for debarment, and declared ineligible or voluntarily excluded from participation in this transaction by any State or Federal departments or agency. Submission is also agreement that the City will be notified of any changes in this status.

N. PROPOSAL PROTEST

All protests must be in writing and filed with the Purchasing Agent within 5 business days of any notices of intent, including, but not exclusively, divisions on pre-qualification of bidders, shortlisting of bidders, or a notice of intent to award a contract. Only bidders who responded to the solicitation may file a bid protest. The offeror must clearly state the reasons for the protest. If an offeror contacts a City Service Area/Unit and indicates a desire to protest an award, the Service Area/Unit shall refer the offeror to the Purchasing Manager. The Purchasing Manager will provide the offeror with the appropriate instructions for filing the protest. The protest shall be reviewed by the City Administrator or designee, whose decision shall be final.

Any inquiries or requests regarding this procurement should be only submitted in writing to the Designated City Contacts provided herein. Attempts by the offeror to initiate contact with anyone other than the Designated City Contacts provided herein that the offeror believes can influence the procurement decision, e.g., Elected Officials, City Administrator, Selection Committee Members, Appointed Committee Members, etc., may lead to immediate elimination from further consideration.

SECTION II - SCOPE OF SERVICES

1. Background

The City of Ann Arbor has the ambitious goal of achieving community-wide carbon neutrality by the year 2030. A key element of that work involves electrifying transportation and supporting growth of electric vehicle (EV) use and ownership throughout the community. To ensure the benefits of EV ownership are experienced across the entire community, the City is building a convenient, reliable, and affordable public EV charging network. The City was awarded an estimated \$2.8 Million from the Federal Highway Administration to expand this network in Ann Arbor. The City seeks to work with a firm to assist in the design and management of construction of these systems in a manner that adheres to the CFI grant requirements, NEVI standards and specifications, and City policies. This request for proposals is NOT for the construction of EVCS', but is for design, engineering, and construction management services. A separate competition will be undertaken for the construction of EVCS systems designed under this RFP.

2. Objective

The City of Ann Arbor Office of Sustainability & Innovations (OSI) is seeking proposals from qualified firms to conduct **Phase I: Pre-Construction** and **Phase II: Final Designs & Construction Management Support** services.

Phase I encompasses all feasibility and design activities necessary to prepare sites for EVCS construction (electrical capacity assessments, site design, utility service evaluation/new service installation, electrical upgrade cost estimation, final engineering drawings, supporting stakeholder engagement efforts with the City, etc.). Phase I will begin with a preliminary list of 30-45 potential sites hosts for public EV charging. Nonviable sites will be eliminated throughout, especially in early stages based on criteria determined by the City. Successful completion of Phase I work will mark the end of **Phase I: Pre-Construction** and transition the project into **Phase II: Final Designs & Construction Management Support**.

Phase II encompasses the development of final, stamped engineering design packages for the City's selected 10–20 final sites, including construction-ready drawings, permitting documentation, and all other required technical materials. During Phase II, the selected contractor will also provide construction-phase support, assisting the City and its construction vendor with utility coordination, permit applications, and technical guidance to ensure a seamless transition from design to installation.

The City has a target to conduct Phase I work as soon as possible and to reach Phase II **no later than January 31, 2027**. The preliminary assessment work needed in Phase I will help the City understand electrical capacity at each site, determine required upgrades, eliminate impractical sites early on, develop cost and time estimates to upgrade electrical components at more viable sites, and get a finalized list of sites to move forward into construction.

Phase I will allow the project team to make decisions around how to allocate the grant funding most effectively. The charging systems must adhere to the Federal NEVI Standards and Specifications. In part, this means that each site will host at least **four** (4) networked EV charging ports capable of simultaneously charging four EVs. These four chargers will either be Level 2, DCFC, or a combination of both.

Throughout the workflow, a regular cadence of communication with City staff is needed to proactively determine site eligibility in early phases to eliminate redundant workflows and efficiently allocate costs.

3. Requirements

This RFP covers design phase and construction management services only. Once final designs are complete, the City will issue a separate solicitation for bids to construct the EVCS systems and will utilize the winning bidder(s) from this RFP for construction management support.

As such, bidders must have the skills and ability to perform all work necessary for 'project readiness' ahead of EVCS construction. This includes electrical capacity inspection and assessment, cost estimation, permitting, coordination with utilities (DTE), and the undertaking of practical and cost-efficient site design of EVCS.

4. Tasks

Electrical Readiness and Requirements Study

Bidders will help the City and site teams understand the site-specific costs to upgrade any electrical equipment or infrastructure to make each identified site ready to receive the EV chargers and the estimated cost of the EVCS installation. In cases outside of City-owned sites, the City will seek to install a new dedicated electrical service for the EVCS. This work would include:

- Cost estimating for upgrade work on the customer's side of the meter (panel upgrades, etc.)
- Cost estimating for the work on utility side of the meter (service drop, transformer upgrade, etc.)
- Helping identify optimized EVCS siting at each site in order to minimize make-ready costs.

A sub-set of this work includes identifying site-specific metering expectations such as:

- **Non-City sites:** Working with electric utility to install dedicated electric service to the site.
- **City-owned sites:** Understanding current capacity and whether load side upgrades are needed.

Although installation, construction, and maintenance are not included in this scope, bidders to this RFP will be responsible for identifying what, if any, electrical upgrades are

needed for each site to be able to host the EV chargers. This includes analyzing both the electrical needs, current infrastructure, and costs to upgrade said electrical infrastructure (should upgrades be necessary). It is anticipated that bidders will work closely with the City and DTE to prepare material so that the upgrades and costs are well understood, and the City can successfully solicit bids for the construction of the EVCS systems. More specifically, the winning bidder of this RFP will be responsible for ensuring:

- If Level 2 Chargers are recommended, each site can deliver at least 6 kW of simultaneous charging per port.
- If DCFC Fast Chargers are recommended, each site can deliver at least **150 kW** of simultaneous charging capability per port
- With 4 ports minimum per site, a total capacity determination would need to be based on expected future pull on the grid.

The electrical assessments and upgrade costing will help the City prioritize sites for EVCS infrastructure. These assessments will outline existing electrical capacity, needed upgrades at each site, and estimated costs. This information will allow the City to narrow the scope of potential sites.

This phase includes working with the utility provider to ensure sufficient electricity at the site. Once final sites have been selected, this phase of work will also include working with the City to acquire and deliver necessary documents for new electrical service applications (this may include property deed, new service application, site plan, load form, riser diagram, etc.). If upgrades are needed, the bidder(s) will assist the City with preparing applications for upgrades.

Site Design – in Compliance with Regulatory Requirements

All proposed work through this RFP must adhere to the regulatory framework laid out under [23 CFR 680](#) – National Electric Vehicle Infrastructure (NEVI) Specifications and Standards, including site design. As such, all bidders must be familiar with these specifications and work with the City to design EVCSs that are compliant with all NEVI Specifications and Standards. As a baseline, proposers must be familiar with, and adhere to National Electric Vehicle Infrastructure (NEVI) requirements, including, but not limited to sections on Connector Types, Power Level, Accessibility, Availability, Safety Considerations (such as Lighting), and Payment Methods.

<https://www.federalregister.gov/documents/2023/02/28/2023-03500/national-electric-vehicle-infrastructure-standards-and-requirements>.

As part of this element of the work, the successful bidder(s) must work with the site hosts and the City to design the EV charging systems. It is expected at least two, and up to five, rounds of design work will happen per site. The first will be a preliminary design based on initial feedback from the site host. The second will be a more refined design based on information gleaned from the electrical assessment as well as ensuring full compliance with NEVI standards. The third will be the **final designs and engineering**

drawings that will be used to solicit competitive bids for EVCS construction.

Regular Check-Ins, Engagement, & Ongoing Site Elimination

Regular, ongoing communication between City staff, potential site hosts, and the utility provider is required to ensure smooth coordination throughout **both Phase I and II**. This will include regular check-ins, e-mail updates on agenda items, and virtual/in-person meetings.

The successful bidder(s) shall work with City staff to identify sites that are not suitable in early stages based on:

- Site visits, including sites' lack of electrical capacity (as determined through the electrical capacity assessment)
- Estimated site upgrade cost projections
- A site's inability to comply with NEVI specifications
- Findings from preliminary site designs, including obstructions that may significantly interfere with future construction

Sites are expected to be removed on a rolling basis through this collaborative check-in and evaluation process. Decisions will be made by the contractor's assessments and the City's elimination criteria, with final determination made by the City as to which sites to move forward and which to remove from further EVCS installation consideration. A small number of additional sites may be introduced into the potential evaluation pool, but the City does not anticipate a significant expansion beyond the current list.

As part of this work, the winning bidder(s) are expected to complete site visits to each candidate location. These site visits should include:

- Locating and identifying utilities within an agreed upon site boundary or adjacent right-of-way (ROW), using information provided by the City, DTE, and other relevant sources. MISS DIG utility location information is subject to confidentiality requirements and shall be used solely for project purposes. An NDA form may need to be signed depending on each site's unique conditions.
- Confirmation of a site's ability to comply with all NEVI-specific site features ([23 CFR 680](#)).
- Confirmation of a site's ability to comply with all ADA requirements.
- Confirmation of a site's ability to comply with all lighting requirements.
- Optimized trenching locations and pathways.

Final Designs

The successful bidder(s) shall **provide final design plans** for developing and installing EVCS, new electrical meters, main distribution updates, and new transformers, as required. Final design plans will be prepared only for the City's final 15-20 sites – as determined exclusively by the City. In addition, the successful bidder(s) shall provide and submit required **stamped and sealed construction documents** for required government **permits and approvals**. These final designs should reflect current site conditions, including buried utilities.

Project Management & Construction Support

It is expected that the winning bidder(s) will continue engaging with the City through the construction phase of the project, ensuring a seamless transition from pre-construction to the construction phase. The City **DOES NOT** anticipate that the winner of this RFP to be the firm constructing the City's EVCS. But firms bidding on this RFP should anticipate being engaged and collaborating with the firms selected to construct the EVCSs. The firm may also be asked to assist in the procurement process for a construction vendor, including proposal review. This will include working with DTE to ensure dedicated electrical service is provided for the EVCS or the EVCS is connected to an existing City owned meter. This will also include applying for all necessary permits for the eventual installation.

Timeline

Bidders must confirm that they can complete all Phase I work, at an estimated 30-45 sites, by **January 31, 2027**. Failure to demonstrate sufficient capacity to meet this timeline will lead to disqualification. By the completion of Phase I, the team will have generated a final list of 15-20 sites that are strong candidates for EVCS installations and created engineering designs for each site. Once final engineering designs are completed, the City will release an Invitation to Bid (ITB) for the construction of these EVCS systems, based on the construction documents produced by the consultant. The consultant will remain involved throughout construction so that the EVCS are installed and online by **June 2028**.

PROPOSAL EVALUATION

1. The selection committee will evaluate each proposal by the above-described criteria and point system (A through C) to select a short-list of firms for further consideration. The City reserves the right to reject any proposal that it determines to be unresponsive and deficient in any of the information requested for evaluation. A proposal with all

the requested information does not guarantee the proposing firm to be a candidate for an interview. The committee may contact references to verify material submitted by the offerors.

2. The committee then will schedule interviews with the selected firms if necessary. The selected firms will be given the opportunity to discuss in more detail their qualifications, past experience, proposed work plan and fee proposal.
3. The interview must include the project team members expected to complete a majority of work on the project, but no more than six members total. The interview shall consist of a presentation of up to thirty minutes (or the length provided by the committee) by the offeror, including the person who will be the project manager on this contract, followed by approximately thirty minutes of questions and answers. Audiovisual aids may be used during the oral interviews. The committee may record the oral interviews.
4. The firms interviewed will then be re-evaluated by the above criteria (A through D), and adjustments to scoring will be made as appropriate. After evaluation of the proposals, further negotiation with the selected firm may be pursued leading to the award of a contract by City Council, if suitable proposals are received.

The City reserves the right to waive the interview process and evaluate the offerors based on their proposals and fee schedules alone and open fee schedules before or prior to interviews.

The City will determine whether the final scope of the project to be negotiated will be entirely as described in this RFP, a portion of the scope, or a revised scope.

Work to be done under this contract is generally described through the detailed specifications and must be completed fully in accordance with the contract documents.

Any proposal that does not conform fully to these instructions may be rejected.

PREPARATION OF PROPOSALS

Proposals should have no plastic bindings but will not be rejected as non-responsive for being bound. Staples or binder clips are acceptable. Proposals should be printed double sided on recycled paper. Proposals should not be more than 30 sheets (60 sides), not including required attachments and resumes.

Each person signing the proposal certifies that they are a person in the offeror's firm/organization responsible for the decisions regarding the fees being offered in the Proposal and has not and will not participate in any action contrary to the terms of this provision.

ADDENDA

If it becomes necessary to revise any part of the RFP, notice of the addendum will be posted to Michigan Inter-governmental Trade Network (MITN) www.mitn.info and/or the City of Ann Arbor web site www.A2gov.org for all parties to download.
