SECTION I - GENERAL INFORMATION

A. OBJECTIVE

The City of Ann Arbor is seeking qualified vendor(s) to assist small food retailers in significantly improving the efficiency of their refrigerant systems and reduce local greenhouse gas emissions. In particular, the City is looking for vendors with EPA Section 608 Technician certifications and capable of providing on-site refrigerant assessments. The vendor should have a critical eye towards working with small businesses to teach them how to identify leaks and help them understand sustainable refrigerant best practices. Interested bidders will also be expected to conduct trainings with local businesses on the proper handling of electronic leak detection equipment and provide recommendations to transition high GWP refrigerant systems to low GWP refrigerant systems.

The selected vendor will be required to work directly with the City's project manager to manage workloads, workflow, and all other elements related to project implementation. The City anticipates making a single award under this contract. All awards shall be good for a period of two (2) years. All pricing provided by this RFP shall be firm for two (2) years.

The City further recognizes that the products and services the City buys have inherent environmental and economic impacts and that the City should make procurement decisions that embody, promote and encourage the City's commitment to the environment.

The City strongly encourages potential vendors to bring forward tested, emerging, innovative, and environmentally preferable products and services that are best suited to the City's environmental principles. This includes products and services such as those with lower greenhouse gas emissions, high recycled content, without toxic substances, those with high reusability or recyclability, those that reduce the consumption of virgin materials, and those with low energy intensity.

SECTION II - SCOPE OF SERVICES

1. Background

In June of 2020, Ann Arbor adopted one of the nation's most aggressive climate plans – A²ZERO. One of the core strategies in A²ZERO is changing the way we use, reuse, and dispose of materials, specifically including high global warming potential (GWP) refrigerants.

On November 7th, 2024, the Ann Arbor City Council voted to accept grant funds from the United States Environmental Protection Agency's ("EPA") FY 2024 - FY 2025 Source Reduction Assistance Grant. This grant is funding the creation of a refrigerant management program to provide technical and financial support to assist small food retailers (such as small grocery stores, gas stations, and convenience stores) in reducing greenhouse gas emissions associated with high global warming potential (GWP) refrigerants. This program aims to be in effect in quarter three of the 2025 calendar year.

To support this work, the City's Office of Sustainability and Innovations (OSI) is requesting bids from qualified and responsive commercial refrigeration professionals who are EPA Section 608 Technician certified to provide technical expertise.

2. Objective

The City is seeking proposals from qualified and responsive vendors to provide technical expertise in scheduling and conducting on-site refrigerant assessments/trainings on best practices in refrigerant management. This initiative will support about 25 local businesses over a two-year period (approximately 12 businesses per year). In addition to the assessments, vendors will be responsible for following up with each participating business to monitor progress and address any questions or concerns that may arise.

The on-site assessments/trainings will include guiding businesses through a hands-on inspection of their refrigerant system, teaching them how to use refrigerant leak detection equipment, and directing them to the City's grant program to financially help them transition from high global warming potential (GWP) refrigerant systems to low-GWP refrigerant systems. These on-site visits are expected to take approximately three hours each.

All work awarded under this RFP must be completed by the end of the grant period in December 2026.

3. Work Flow

The winning bidder will provide the following services:

- **Research promising materials:** Research refrigerant leak detector model(s) and present options to staff from the City's Office of Sustainability and Innovations

(OSI). Work directly with OSI staff to make decisions on what leak detection equipment to purchase.

- **Business outreach and program engagement:** Work with OSI staff to recruit approximately 25 small food retail businesses (roughly 12 per year) in Ann Arbor as participants in the technical assistance program by assisting with outreach and promotion. Additionally, assist OSI staff in engaging with small food retail businesses around the City’s financial assistance grant program for refrigeration system upgrades and retrofits.
- **On-site technical assistance and training:** Schedule and conduct on-site visits to each of the 25 participating businesses to provide technical assistance and training including:
 - Guiding the workers/owner(s) of the business through a hands-on inspection of their refrigerant system using Appendix D: Supermarket Walk-Thru Checklist of [GreenChill’s Guide to Refrigeration Management for Small and Independent Grocers](#)
 - Providing workers with an overview of the components of a refrigeration system and where/why leaks generally occur.
 - Overviewing the importance of establishing business-wide “no-tolerance policies” for refrigerant leaks, including background on why refrigerant leaks are harmful for the business, the environment, and the community.
 - Discussing warning signs for faulty refrigeration systems.
 - Providing local contacts that can immediately repair faulty refrigeration systems and/or replace systems with low GWP alternatives.
 - Sharing insights on techniques and funding to improve refrigeration system performance.
 - Training in performing preventative maintenance on refrigeration systems.
 - Detailing the importance and process of follow-up checks to verify that refrigeration systems are leak-free after repairs are performed.
 - Providing recommendations based on the assessment.
 - Includes providing each business with a free handheld electronic leak detector (funded by the City).
- **Follow-up support:** Follow-up with businesses via call or in-person two weeks after on-site visits to answer questions and gauge progress towards making any identified relevant improvements.
- **Program metrics and data collection:** Identify key metrics and create a spreadsheet to record data during on-site visits and follow-up meetings. This spreadsheet should include items such as length of visit, number of leaks identified, and current refrigerant system and refrigerants used. Meet with OSI staff prior to first on-site visit to finalize data collection strategy. Collect data using the resulting spreadsheet during on-site visits.

- **Progress reporting:** Coordinate bi-monthly meetings with OSI, beginning at the start of this contract, to provide updates on progress including milestones, challenges, and outcomes.
- **Business roundtables:** Participate in 2 business roundtables hosted by OSI (one roundtable per year) to encourage business-to-business sharing of lessons learned regarding refrigerant management.
- **Program evaluation:** Provide a program evaluation by the end of the contract, offering feedback to refine and expand the program. Support OSI’s creation of a replication guide that can be used by other local governments.
