

Sustainable Energy Utility (SEU)

Hello friends of the SEU,

It's been a busy start to the new year. In the next week, we have two opportunities for the public to learn about the SEU, so please read on and join us at upcoming events!

- January 27th at 6PM is the 15th annual **Sustainability Forum: "New Initiatives for a New Year: Paving a Path for Sustainability Progress in 2026"**. Join us in person or watch the livestream to learn more about the SEU and ask your questions. More about the series [here](#).

- On January 29th at 7 PM, join a **virtual presentation about the SEU, hosted by the Great Lakes Renewable Energy Association (GLREA)** as part of their weekly Solar Stories series. Register [here](#) to receive the link.

The SEU was featured in [The Communicator](#)-The Community High School magazine and re-printed by the [Youth Environmental Press Team](#). We're grateful for our local youth community's interest!

Other highlights in recent weeks include:

- The SEU closed a **request for billing software proposals**. We are evaluating the nine responses, and anticipate selecting a preferred vendor this month.
- We hosted a **workshop for solar and battery storage contractors** to learn about, and share input on, the SEU's proposed operational and technical approach. We are grateful to nearly 40 attendees who joined us! A recording of the workshop presentation is available [here](#).
