# VISION ZERO

Serious Crashes by Year

## VISION ZERO

The City of Ann Arbor has a Vision Zero goal to eliminate fatalities and serious injuries resulting from traffic crashes. As part of its commitment to Vision Zero, the Ann Arbor Police Department and the Ann Arbor Transportation Department have teamed up to create three safety corridors across the city.

Using 2019-2024 crash data, three safety corridors have been identified based on fatalities and serious injuries. Beginning immediately, the Ann Arbor Police Department will have an increased focus on enforcing the following areas.

- Washtenaw Corridor – From Geddes Avenue to Huron Parkway
- Packard Corridor – From Fifth Avenue to Turnberry Drive
- Jackson Corridor – From Burwood Avenue to Gralake Avenue

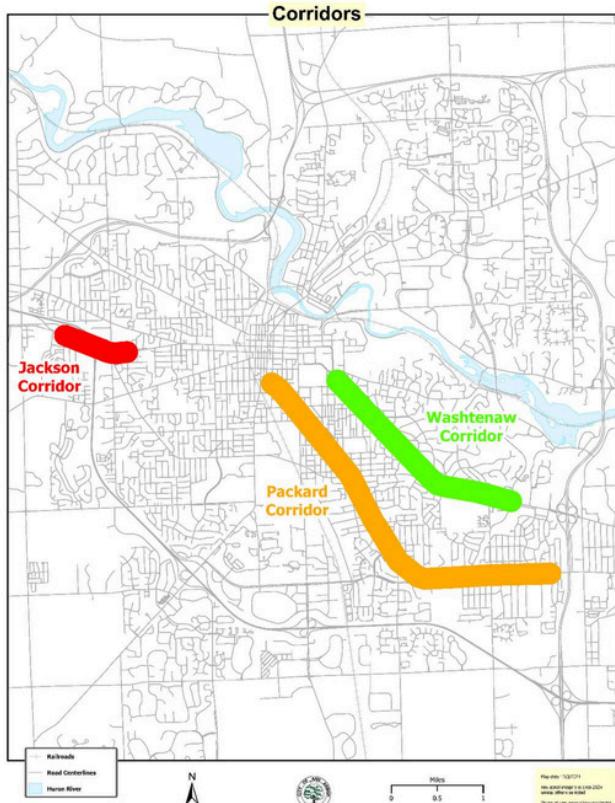

Speed is a major part of how severe and deadly a crash will be, therefore slowing vehicles down is an important strategy towards reaching Vision Zero. Major streets are 25% of total streets in Ann Arbor and witness 89% of the severe and fatal traffic crashes.

### What is Vision Zero?

- A multi-national effort to end traffic-related fatalities and injuries while increasing safe, equitable mobility worldwide.
- First adopted in Sweden in the late 1990s, the initiative has led to fewer traffic deaths and injuries in the cities that have implemented its policies.

# DRIVING EQUALITY

On July 6, 2023, City Council passed the **Driving Equality Ordinance**.

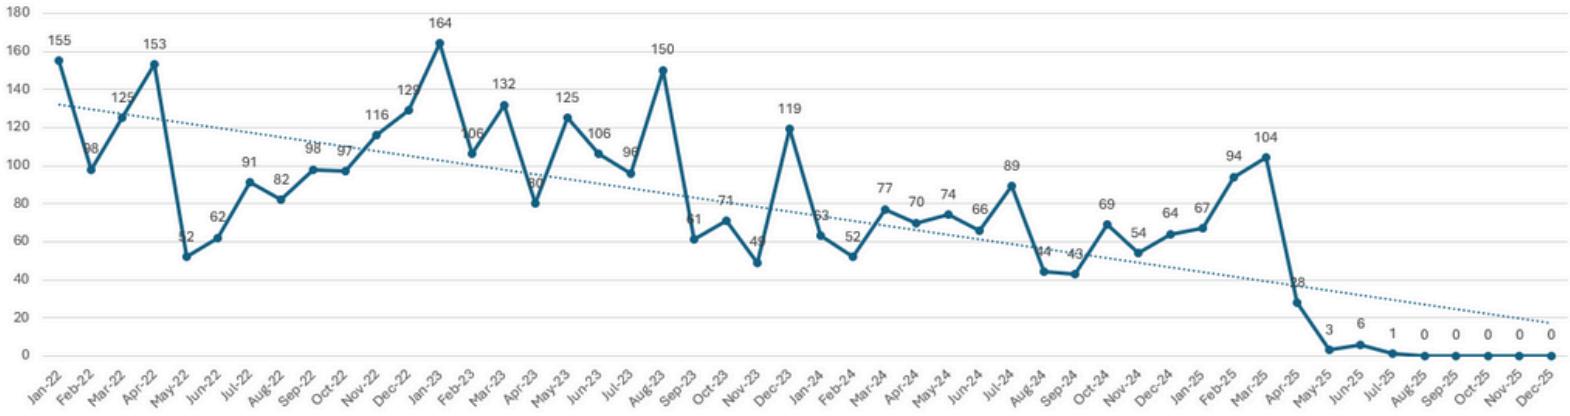

This ordinance is intended to clarify and direct the appropriate methods and circumstances for the initiation of traffic stops and the enforcement of traffic violations in order to ensure the

equitable, transparent and non-discriminatory administration of traffic stops, eliminate biased stops, prevent racial profiling, protect public safety, and increase public trust in law enforcement.
