

## Oakwoods Nature Area

This 55-acre park is located in the far northeast corner of Ann Arbor. The park is tucked between residential neighborhoods and is a quick walk to several other city parks including Sugarbush and Arbor Hills Nature Area. It is an undeveloped park with natural, unpaved trails sprawling throughout. Oakwoods Nature Area is home to an oak-hickory forest, several ponds and a surrounding wetland that make it a beautiful spot for a hike in any season. You will likely catch a glimpse of our local flora and fauna including a variety of bird species and several frog types in the spring.

**Total trail length:** 1.6 (total miles of trails)

**Topography:** Rolling

**Trail type:** Dirt footpaths

Visit the [park webpage](#) for additional park details. Check out [GIVE365](#) for [Visit Every Park](#) information or to track your walks and earn prizes.

*Please remember nature areas are not cleared or salted so walk at your own risk. Consider walking with sticks/poles for stability.*
