

Southeast Area Park

If you are looking to get your steps in on an even, flat surface and don't want to commit to a long hike, this loop walk is a great choice. The park name gives away its location as it is located in the southeast area of the city. Southeast Area Park features a paved pathway about ½ mile in length around the park taking you around the ballfields and the playgrounds. While not a nature area, this park walk is perfect for strollers or walkers of all levels and features additional park amenities such as open green space, a basketball court, two playgrounds and convenient parking.

Total trail length: .5 mile outer loop

Topography: Flat

Trail type: Paved paths

Visit the [park webpage](#) for additional park details and parking details. Check out [GIVE365](#) for [Visit Every Park](#) information or to track your walks and earn prizes.

[Winter in the parks](#) - while this path is scheduled for snow clearing, always watch your step and consider weather conditions as paths may be slick or icy. Consider walking with sticks/poles for stability.
