THE National Citizen Survey[™]

Ann Arbor, MI

Dashboard Summary of Findings 2015

2955 Valmont Road Suite 300 Boulder, Colorado 80301 n-r-c.com • 303-444-7863

777 North Capitol Street NE Suite 500 Washington, DC 20002 icma.org • 800-745-8780

Summary

The National Citizen Survey[™] (The NCS[™]) is a collaborative effort between National Research Center, Inc. (NRC) and the International City/County Management Association (ICMA). The survey and its administration are standardized to assure high quality research methods and directly comparable results across The NCS communities. The NCS captures residents' opinions within the three pillars of a community (Community Characteristics, Governance and Participation) across eight central facets of community (Safety, Mobility, Natural Environment, Built Environment, Economy, Recreation and Wellness, Education and Enrichment and Community Engagement). This report summarizes Ann Arbor's performance in the eight facets of community livability with the "General" rating as a summary of results from the overarching questions not shown within any of the eight facets. The "Overall" represents the community pillar in its entirety (the eight facets and general).

By summarizing resident ratings across the eight facets and three pillars of a livable community, a picture of Ann Arbor's community livability emerges. Below, the color of each community facet summarizes how residents rated each of the pillars that support it – Community Characteristics, Governance and Participation. When most ratings were higher than the benchmark, the color is the darkest shade; when most ratings were lower than the benchmark, the color is the darkest shade; when most ratings were lower than the benchmark, the color is the darkest shade; when most ratings were lower than the color is the lightest shade. A mix of ratings (higher and lower than the benchmark) results in a color between the extremes.

Overall, ratings for the dimensions of community livability were strong and similar to or higher than communities across the nation. The aspects of Economy, Recreation and Wellness and Education and Enrichment within the pillars of Community Characteristics and Governance were rated exceptionally high. The overall and general aspects, as well as the facets of Natural Environment and Community Engagement within Community Characteristics, as well as Mobility and Built Environment in the pillar of Participation were also rated highly and tended to be higher than the benchmarks. This information can be helpful in identifying the areas that merit more attention.

	Comm	unity Characte	eristics		Governance		Participation			
	Higher	Similar	Lower	Higher	Similar	Lower	Higher	Similar	Lower
